

Barclays plc

Update

Key Rating Drivers

Diversified Group: Barclays plc's (Barclays) ratings reflect the group's strong franchises in UK retail banking, UK and US credit cards, corporate banking and investment banking, which provide earnings diversification by product and geography. The ratings also factor in the group's sizeable trading and capital market businesses, which can result in earnings volatility. The ratings are also underpinned by Barclays' solid capitalisation and strong funding and liquidity.

Two Main Opcos: The Viability Ratings (VRs) of Barclays' main operating companies (opcos), Barclays Bank plc (BBplc) and Barclays Bank UK PLC (BBUK), include ordinary support from the group. BBUK, a UK-focused retail and SME bank, has solid asset quality and stable funding dominated by granular deposits. BBplc, the larger bank when measured by total assets, houses the large corporate and investment bank, and international cards and payments businesses.

Opcos Rating Uplift: BBplc and BBUK's Long-Term Issuer Default Ratings (IDRs) and long-term senior debt ratings are one notch above their respective VRs and one notch above Barclays' Long-Term IDR. This reflects the group's large buffers of junior and holdco debt that can protect both opcos' external senior unsecured creditors from default in the event of failure.

Moderate Impaired Loans, Rising LICs: Barclays' impaired (Stage 3) loan ratio has held up well, at 2.1% at end-2023. Conservative underwriting standards, combined with routine use of risk transfer transactions, should ensure manageable loan losses in UK mortgage and corporate lending. However, the loan impairment charges (LICs)/gross loans ratio rose significantly to 50bp in 2023 (2022: 32bp), driven mainly by US cards, reflecting an increase in delinquency rates from the low levels seen since the pandemic, as well as targeted US card balance growth.

Fitch Ratings expect the group's impaired loan ratio to remain below 3% through 2024, but expects further LIC increases to weigh on operating profitability.

Reasonable Profitability: Barclays' operating profit/risk-weighted assets (RWAs) of 1.9% in 2023 (2022: 2.1%) was reasonable, but below the large European banks' average. Weaker revenue in investment banking, which had benefitted from very strong global markets performance in 2022, partly offset higher net interest income. Higher structural hedge income should continue to partially compensate for declining net interest margins in 2024, and the relatively high interest rates should further provide a substantial buffer to absorb rising LICs.

Adequate Capital Buffers: The bank's end-2023 common equity Tier 1 (CET1) ratio of 13.8% (13.7% excluding IFRS 9 transitional relief) is comparable with that of global trading and universal bank peers. We expect organic capital generation to allow the CET1 ratio to remain within the bank's 13%-14% target, even in a more challenging operating environment.

Strong Liquidity: Barclays' funding profile is stable and diversified, underpinned by a strong UK retail deposit franchise that funds retail assets, and good market access to fund wholesale operations. We expect the group's Fitch-calculated loans/deposits ratio (65% at end-2023) to normalise upwards as savings rates moderate and as loan book growth resumes. Liquidity is conservatively managed, with a liquidity coverage ratio of 161% at end-2023.

Holdco's VR Equalised with Opcos: We equalise the VR of Barclays, the group's holding company (holdco), with that of its main opcos. This reflects moderate Fitch-calculated common equity double leverage (end-2023: 111%), and our expectation that the holdco's liquidity will continue to be managed prudently.

Rating Sensitivities

Factors that Could, Individually or Collectively, Lead to Negative Rating Action/Downgrade

Barclays' ratings are primarily sensitive to a sharp deterioration in asset quality, particularly if combined with weakened capital generation that would result in capital erosion. The ratings would likely be downgraded if the gross impaired loan ratio exceeded 3% for a sustained period and the CET1 ratio (excluding IFRS 9 transitional relief) fell below 13% without a clear path to swiftly restoring it. The ratings would also come under pressure if profitability weakened and we no longer expected the group to generate an operating profit/RWAs ratio sustainably above 1.5%.

The ratings could also come under pressure if the operating environment deterioration is more severe than we expect, resulting in structurally weaker financial metrics. A rising risk appetite would also weigh on the ratings, particularly if this occurred during a period of weaker economic prospects for the group's main markets. This could be indicated by a significant increase in RWAs allocated to investment banking activities or towards higher-risk credit exposures.

BBUK and BBplc's VRs would come under pressure if the subsidiaries' financial profiles weakened and we believed that ordinary support from the group was not available to offset these weaknesses. BBUK's ratings could withstand a one-notch downgrade of Barclays' ratings provided that BBUK's financial profile at that point was significantly stronger than that of the rest of the group.

The one-notch uplift applied to the IDRs of BBplc and BBUK is also sensitive to Barclays' maintenance of a clear and credible role as the resolution entity for the group.

The ratings are also sensitive to holdco double leverage exceeding 120%, without a clear path to reducing it below that threshold.

Factors that Could, Individually or Collectively, Lead to Positive Rating Action/Upgrade

Over the medium term, upside potential to Barclays' ratings would require evidence that the group is able to generate strong operating profitability in a weakened operating environment. Maintaining operating profit/RWAs materially above 1.5% through a full economic cycle could result in upwards pressure on ratings if the bank also maintained healthy asset quality and increased its CET1 ratio above its 13%–14% target range.

BBUK and BBplc's VRs are closely linked to Barclays' VR and could be upgraded if Barclays' financial profile strengthened materially.

Other Debt and Issuer Ratings

Debt Rating Classes

Rating level	Barclays plc	Barclays Bank UK PLC	Barclays Bank plc	Barclays Capital Inc.
Senior unsecured	A/F1	A+/F1	A+/F1	F1
Senior secured (GCMTN)	-	-	A+/F1	-
Tier 2 subordinated debt	BBB+	-	BBB+	-
Legacy upper Tier 2 debt	-	-	BBB	-
Additional Tier 1 notes, preference shares	BBB-	-	BBB-	-

Source: Fitch Ratings

The senior unsecured debt ratings are aligned with the respective issuers' IDRs. The ratings of BBplc's global collateralised medium-term note (GCMTN) programme and notes under the programme are aligned with BBplc's senior unsecured debt ratings. This is because the terms of the notes do not allow for a one-notch uplift of the ratings due to the wide range of eligible collateral used.

Barclays and BBplc's Tier 2 debt ratings are two notches below their respective VRs, reflecting this class of debt's poor recovery prospects. BBplc's legacy upper Tier 2 instruments are rated lower, at three notches below the VR, due to incremental non-performance risk in addition to poor recovery prospects.

Additional Tier 1 instruments and preference shares with no constraints on coupon omission are rated four notches below the relevant VRs. The issues are notched down twice for loss severity, reflecting their deep subordination and poor recoveries as the instruments can be converted into equity or written down well ahead of resolution. In addition, they are notched down twice for high non-performance risk due to fully discretionary coupon omission. The notching of these instruments is supported by our expectation that the group will maintain a buffer of at least 100bp over the minimum capital requirements which, whose breach would trigger coupon omission on the bonds.

Issuer Ratings

Rating level	Barclays plc	Barclays Bank UK PLC	Barclays Bank plc	Barclays Bank Ireland plc	Barclays Capital Inc.

Viability Rating	a	a	a	-	-
Shareholder Support Rating	-	a	-	a+	a+
Government Support Rating	no support	-	no support	-	-
Derivative Counterparty Rating	-	A+(dcr)	A+(dcr)	A+(dcr)	A+(dcr)

Source: Fitch Ratings

Issuer Ratings

BBUK’s Shareholder Support Rating (SSR) of ‘a’ reflects our view of an extremely high probability of shareholder support from Barclays, and indirectly from BBplc if needed, given the ring-fenced bank’s strategic role in the group and reputational considerations. We believe that support would be manageable, despite its size, as we expect capital support to be moderate compared with the size of the group.

Barclays Bank Ireland plc (BBI) and Barclays Capital Inc.’s (BCI) SSRs of ‘a+’ and their Long- and Short-Term IDRs of ‘A+’ and ‘F1’, respectively, are equalised with those of their intermediate parent, BBplc, which reflects our view of an extremely high likelihood that the subsidiaries would be supported if needed. Their Long-Term IDRs are equalised with BBplc’s IDR rather than its VR because we expect sufficient internal loss-absorbing buffers to protect the subsidiaries’ senior creditors if the group fails.

Fitch views BCI and BBI’s businesses as core to the group, in particular to the corporate and investment banking client relationships and strategy. In our view, this provides a strong incentive for BBplc to support both entities. BBI and BCI are highly integrated within BBplc’s management, governance and group risk policies. Regulatory requirements mean that capital and liquidity are not fully fungible, but balance sheet and funding integration is significant.

The Derivative Counterparty Ratings (DCRs) of BBUK, BBplc, BBI and BCI are aligned with their respective Long-Term IDRs, because derivative counterparties in the UK have no preferential status over other senior obligations in a resolution.

Significant Changes from Last Review

Barclays 2023 Results and Strategy Update

Barclays reported a pre-tax profit of GBP7.5 billion in 2023 (-3% yoy), excluding GBP927 million of restructuring costs in 4Q23 on revenues that were higher yoy, driven by higher net interest income and higher US credit card balances. However, profitability suffered from subdued trading and investment banking activity, and pressure on the US credit card portfolio as LICs were increased materially in anticipation of loan growth and a further rise in delinquencies (loan loss rate on US cards as calculated by Barclays: 636bp in 4Q23, above the 400bp long-term average).

Barclays presented its updated strategy, which aims to generate higher and more stable returns, and a return on tangible equity (RoTE) of at least 12% by 2026. The group intends to reallocate capital largely towards Barclays UK and the UK Corporate Bank, which are relatively profitable, and strengthen and stabilise profitability in its investment bank, which has underperformed, compared to other business units, on a RoTE basis over the past three years.

We believe that Barclays’ plan to expand unsecured retail lending and higher-LTV UK mortgages, and to increase UK corporate lending as the economy recovers, will increase credit risk. This could weaken the bank’s overall risk profile and asset quality, if credit metrics weaken materially. Barclays is also targeting GBP2 billion of cost efficiencies by 2026, of which GBP1 billion is likely to be realised in 2024, with modest incremental costs to achieve following the GBP927 million booked in 4Q23. We believe the reorganisation and cost savings initiatives carry only modest execution risk due to the incremental nature of the planned changes. The acquisitions of Kensington Mortgages, completed in 2023, and of Tesco Bank’s portfolio, due later this year, are relatively small compared to Barclays.

The group also announced a reorganisation to five business units, from three, with the UK Corporate Bank separated from the Investment Bank, and the former Consumer, Cards and Payments Division disaggregated into Private Banking & Wealth Management and the US Consumer Bank.

The Key Rating Driver (KRD) weightings used to determine the implied VR are shown as percentages at the top. In cases where the implied VR is adjusted upwards or downwards to arrive at the VR, the KRD associated with the adjustment reason is highlighted in red. The shaded areas indicate the benchmark-implied scores for each KRD.

VR - Adjustments to Key Rating Drivers

The outlook on the operating environment score for domestic UK banks was negative at the time of the last rating committee but was revised to stable on 25 March 2024, following the revision of the Outlook on the UK's 'AA-' sovereign rating to Stable.

The funding and liquidity score of 'a' has been assigned below the 'aa' implied category score due to the following adjustment reason: historical and future metrics (negative).

Ownership	Neutral

The colours indicate the weighting of each KRD in the assessment.
■ Higher influence ■ Moderate influence ■ Lower influence

Note: The Outlook on the UK's sovereign rating was Negative at the time of the last rating committee, but was revised to Stable on 22 March 2024.

Barclays and BBplc's Government Support Ratings (GSRs) of no support (ns) reflect Fitch's view that the opco and holdco's senior creditors cannot rely on extraordinary support from the sovereign in the event that Barclays or BBplc become non-viable. The UK's legislation and regulations are likely to require senior creditors to participate in losses for resolving even large banking groups. BBplc's GSR is based on government support because we believe that its role as non-ring-fenced bank and its size make shareholder support from Barclays, and indirectly from BBUK, unlikely.

Environmental, Social and Governance Considerations

FitchRatings Barclays plc

Banks
Ratings Navigator

Credit-Relevant ESG Derivation

Barclays plc has 5 ESG potential rating drivers ➔ Barclays plc has exposure to compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security) but this has very low impact on the rating. ➔ Governance is minimally relevant to the rating and is not currently a driver.	key driver	0	issues	5	
	driver	0	issues	4	
	potential driver	5	issues	3	
	not a rating driver	4	issues	2	
		5	issues	1	

Environmental (E)

Waste & Hazardous Materials Management; Ecological Impacts	1	n.a.	n.a.	2
Exposure to Environmental Impacts	2	Impact of extreme weather events on assets and/or operations and corresponding risk appetite & management; catastrophe risk; credit concentrations	Business Profile (incl. Management & governance); Risk Profile; Asset Quality	1

How to Read This Page
ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference	S Scale
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Business Profile (incl. Management & governance); Risk Profile	5
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Business Profile (incl. Management & governance); Risk Profile	4
Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Business Profile (incl. Management & governance)	3
Employee Wellbeing	1	n.a.	n.a.	2
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Business Profile (incl. Management & governance); Financial Profile	1

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations' Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference	G Scale	CREDIT-RELEVANT ESG SCALE
Management Strategy	3	Operational implementation of strategy	Business Profile (incl. Management & governance)	5	5 Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal/compliance risks; business continuity; key person risk; related party transactions	Business Profile (incl. Management & governance); Earnings & Profitability; Capitalisation & Leverage	4	4 Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Business Profile (incl. Management & governance)	3	3 Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Business Profile (incl. Management & governance)	2	2 Irrelevant to the entity rating but relevant to the sector.
				1	1 Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance, if present, is a score of '3'. This means ESG issues are credit neutral or have only a minimal credit impact on the entities, either due to their nature or to the way in which they are being managed by the entities. Fitch's ESG Relevance Scores are not inputs in the rating process; they are an observation on the relevance and materiality of ESG factors in the rating decision. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

SOLICITATION & PARTICIPATION STATUS

For information on the solicitation status of the ratings included within this report, please refer to the solicitation status shown in the relevant entity's summary page of the Fitch Ratings website.

Details of permissible or ancillary service(s) for which the lead analyst is based in an ESMA- or FCA-registered Fitch Ratings company (or branch of such a company) can be found on the entity summary page for this issuer on the Fitch Ratings website.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed. Fitch Ratings makes routine, commonly-accepted adjustments to reported financial data in accordance with the relevant criteria and/or industry standards to provide financial metric consistency for entities in the same sector or asset class.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.

Fitch Ratings, Inc. is registered with the U.S. Securities and Exchange Commission as a Nationally Recognized Statistical Rating Organization (the "NRSRO"). While certain of the NRSRO's credit rating subsidiaries are listed on Item 3 of Form NRSRO and as such are authorized to issue credit ratings on behalf of the NRSRO (see <https://www.fitchratings.com/site/regulatory>), other credit rating subsidiaries are not listed on Form NRSRO (the "non-NRSROs") and therefore credit ratings issued by those subsidiaries are not issued on behalf of the NRSRO. However, non-NRSRO personnel may participate in determining credit ratings issued by or on behalf of the NRSRO.
