

Barclays PLC**Statement on results of the 2011 EBA EU-wide stress test**

Barclays PLC notes the publication of the stress test outcomes for European banks by the European Banking Authority (“EBA”) today. In summary and under EBA assumptions:

- The EBA-defined stressed Core Tier 1 capital (“CT1”) ratio is 7.3%. This is significantly above the 5% minimum level set by the EBA.
- The EBA methodology assumes zero capital value for Barclays investment in BlackRock. Without this deduction Barclays stressed CT1 ratio would be close to 8%.
- Throughout the stressed period Barclays remains profitable and its capital resources increase.
- RWAs are assumed to increase by about £150bn resulting in the reduced CT1 ratio.

Outcome of the modelled stressed scenario at 31 December 2012

2010 Basel-defined CT1 ratio	10.8%
2010 EBA-defined CT1 ratio	10.0%
EBA Stress Test Results	
2 year cumulative operating profit	£ 14,968m
2 year cumulative banking book impairment	£ (11,018m)
EBA-calculated risk weighted assets (“RWAs”)	£567,454m
Resulting EBA stressed CT1 ratio	7.3%

Barclays regularly conducts stress tests, for internal purposes and for the FSA. The results consistently demonstrate that Barclays has capital in excess of all regulatory requirements.

Notes:

- The stress test was carried out based on the EBA common methodology and key common assumptions (e.g. constant balance sheet, uniform treatment of securitisation exposures) as published in the EBA Methodological Note and is intended by the EBA to provide a what-if analysis aimed at supporting the supervisory assessment of the adequacy of capital of European banks. Therefore, the information relative to the baseline scenarios is provided only for comparison purposes. Neither the baseline scenario nor the adverse scenario should in any way be construed as a Barclays forecast or directly compared to other information prepared by Barclays.
- More details on the scenarios, assumptions and methodology are available from the EBA website: <http://eba.europa.eu/EU-wide-stress-testing/2011.aspx>
- The EBA stress test methodology makes no allowance for management actions regarding portfolio composition over time or cost reductions to mitigate the modelled stresses. The full summary of EBA stress test results, attached in the Appendix to this announcement, provides further details of the impact of these stresses on Barclays. A GBP-denominated spreadsheet is available via the Investor Relations website: <http://group.barclays.com/Investor-Relations/Investor-news/Regulatory-announcements>
- Barclays expects to announce its Interim Results for the 6 months to the end of June 2011 on 2 August 2011.
- Barclays is a major global financial services provider engaged in retail banking, credit cards, corporate and investment banking and wealth management with an extensive international presence in Europe, the Americas, Africa and Asia. With over 300 years of history and expertise in banking, Barclays operates in over 50 countries and employs over 147,000 people. Barclays moves, lends, invests and protects money for over 48 million customers and clients worldwide. For further information about Barclays, please visit our website www.barclays.com. Neither the content of the Barclays website nor any website accessible by hyperlinks on the Barclays website is incorporated in, or forms any part of, this announcement

Appendix
Results of the 2011 EBA EU-wide stress test: Summary (1-3)

Name of the bank: Barclays

Actual results at 31 December 2010	million EUR, %
Operating profit before impairments	13,243
Impairment losses on financial and non-financial assets in the banking book	-6,571
Risk weighted assets (4)	461,107
Core Tier 1 capital (4)	46,232
Core Tier 1 capital ratio, % (4)	10.0%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark	0
Outcomes of the adverse scenario at 31 December 2012, excluding all mitigating actions taken in 2011	%
Core Tier 1 Capital ratio	7.3%

Outcomes of the adverse scenario at 31 December 2012, including recognised mitigating measures as of 30 April 2011	million EUR, %
2 yr cumulative operating profit before impairments	17,340
<i>of which 2 yr cumulative losses from the stress in the trading book</i>	<i>-6,137</i>
<i>of which valuation losses due to sovereign shock</i>	<i>-752</i>
2 yr cumulative impairment losses on financial and non-financial assets in the banking book	-12,764
Risk weighted assets	657,378
Core Tier 1 Capital	48,039
Core Tier 1 Capital ratio (%)	7.3%
Additional capital needed to reach a 5 % Core Tier 1 capital benchmark	0
Effects from the recognised mitigating measures put in place until 30 April 2011 (5)	
<i>Equity raisings announced and fully committed between 31 December 2010 and 30 April 2011 (CT1 million EUR)</i>	
<i>Effect of government support publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)</i>	
<i>Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on Core Tier 1 capital ratio (percentage points of CT1 ratio)</i>	

Additional taken or planned mitigating measures	percentage points contributing to capital ratio
Use of provisions and/or other reserves (including release of countercyclical provisions)	
Divestments and other management actions taken by 30 April 2011	
Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules	
Future planned issuances of common equity instruments (private issuances)	
Future planned government subscriptions of capital instruments (including hybrids)	
Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities	
Supervisory recognised capital ratio after all current and future mitigating actions as of 31 December 2012, % (6)	7.3%

Notes

(1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption and incorporates regulatory transitional floors, where binding (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).

(2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.

(3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.

(4) Full static balance sheet assumption excluding any mitigating management actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures and capital raisings fully paid in before 31 December 2010 are included).

(5) Effects of capital raisings, government support and mandatory restructuring plans publicly announced and fully committed in period from 31 December 2010 to 30 April 2011, which are incorporated in the Core Tier 1 capital ratio reported as the outcome of the stress test.

(6) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

Results of the 2011 EBA EU-wide stress test: Aggregate information and evolution of capital (1-4)

Name of the bank: Barclays

All in million EUR, or %

A. Results of the stress test based on the full static balance sheet assumption without any mitigating actions, mandatory restructuring or capital raisings post 31 December 2010 (all government support measures fully paid in before 31 December 2010 are included)

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets (full static balance sheet assumption)	461,107	527,522	541,911	595,739	657,378
Common equity according to EBA definition	46,232	49,141	54,148	46,101	48,039
<i>of which ordinary shares subscribed by government</i>					
Other existing subscribed government capital (before 31 December 2010)					
Core Tier 1 capital (full static balance sheet assumption)	46,232	49,141	54,148	46,101	48,039
Core Tier 1 capital ratio (%)	10.0%	9.3%	10.0%	7.7%	7.3%

B. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 31 December 2010

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets (full static balance sheet assumption)	461,107	527,522	541,911	595,739	657,378
<i>Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on RWA (+/-)</i>					
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	461,107	527,522	541,911	595,739	657,378
Core Tier 1 Capital (full static balance sheet assumption)	46,232	49,141	54,148	46,101	48,039
<i>Effect of mandatory restructuring plans, publicly announced and fully committed before 31 December 2010 on Core Tier 1 capital (+/-)</i>					
Core Tier 1 capital after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	46,232	49,141	54,148	46,101	48,039
Core Tier 1 capital ratio (%)	10.0%	9.3%	10.0%	7.7%	7.3%

C. Results of the stress test recognising capital issuance and mandatory restructuring plans publicly announced and fully committed before 30 April 2011

Capital adequacy	2010	Baseline scenario		Adverse scenario	
		2011	2012	2011	2012
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	461,107	527,522	541,911	595,739	657,378
<i>Effect of mandatory restructuring plans, publicly announced and fully committed in period from 31 December 2010 to 30 April 2011 on RWA (+/-)</i>					
Risk weighted assets after the effects of mandatory restructuring plans publicly announced and fully committed before 30 April 2011		527,522	541,911	595,739	657,378
<i>of which RWA in banking book</i>		349,229	350,149	370,596	384,240
<i>of which RWA in trading book</i>		99,229	99,229	100,762	100,762
<i>of which RWA on securitisation positions (banking and trading book)</i>		40,124	53,593	85,441	133,437
Total assets after the effects of mandatory restructuring plans publicly announced and fully committed and equity raised and fully committed by 30 April 2011	1,725,709	1,725,709	1,725,709	1,725,709	1,725,709
Core Tier 1 capital after the effects of mandatory restructuring plans publicly announced and fully committed before 31 December 2010	46,232	49,141	54,148	46,101	48,039

D. Other mitigating measures (see Mitigating measures worksheet for details), million EUR (14)

All effects as compared to regulatory aggregates as reported in Section C	Baseline scenario		Adverse scenario	
	2011	2012	2011	2012
A) Use of provisions and/or other reserves (including release of countercyclical provisions), capital ratio effect (6)				
B) Divestments and other management actions taken by 30 April 2011, RWA effect (+/-)				
B1) Divestments and other business decisions taken by 30 April 2011, capital ratio effect (+/-)				
C) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules, RWA effect (+/-)				
C1) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules, capital ratio effect (+/-)				
D) Future planned issuances of common equity instruments (private issuances), capital ratio effect				
E) Future planned government subscriptions of capital instruments (including hybrids), capital ratio effect				
F) Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities, RWA effect (+/-)				
F1) Other (existing and future) instruments recognised as appropriate back-stop measures by national supervisory authorities, capital ratio effect (+/-)				
Risk weighted assets after other mitigating measures (B+C+F)	527,522	541,911	595,739	657,378
Capital after other mitigating measures (A+B1+C1+D+E+F1)	49,141	54,148	46,101	48,039
Supervisory recognised capital ratio (%) (15)	9.3%	10.0%	7.7%	7.3%

Notes and definitions

- (1) The stress test was carried using the EBA common methodology, which includes a static balance sheet assumption (see <http://www.eba.europa.eu/EU-wide-stress-testing/2011.aspx> for the details on the EBA methodology).
- (2) All capital elements and ratios are presented in accordance with the EBA definition of Core Tier 1 capital set up for the purposes of the EU-wide stress test, and therefore may differ from the definitions used by national supervisory authorities and/or reported by institutions in public disclosures.
- (3) Neither baseline scenario nor the adverse scenario and results of the stress test should in any way be construed as a bank's forecast or directly compared to bank's other published information.
- (4) Regulatory transitional floors are applied where binding. RWA for credit risk have been calculated in accordance with the EBA methodology assuming an additional floor imposed at a level of RWA, before regulatory transitional floors, for December 2010 for both IRB and STA portfolios.
- (5) Banks are required to provide explanations of what "Other operating income" and "Other income" constitutes for.
Composition of "Other operating income" and "Other income":
Other operating income: Net fee and commission income, net investment income
Other income: Share of post-tax results of associates and joint ventures, profit on disposals and gain on acquisitions (2010 only)
- (6) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D as other mitigating measures.
- (7) Net profit includes profit attributable to minority interests.
- (8) Deferred tax assets as referred to in paragraph 69 of BCBS publication dated December 2010 : "Basel 3 – a global regulatory framework for more resilient banks and banking systems".
- (9) Stock of provisions includes collective and specific provisions as well as countercyclical provisions, in the jurisdictions, where required by the national legislation.
- (10) Provisions for non-defaulted exposures to sovereigns and financial institutions have been computed taking into account benchmark risk parameters (PDs and LGDs) provided by the EBA and referring to external credit ratings and assuming hypothetical scenario of rating agency downgrades of sovereigns.
- (11) For definition of commercial real estate please refer to footnote (5) in the worksheet "4 - EADs".
- (12) Coverage ratio = stock of provisions on defaulted assets / stock of defaulted assets expressed in EAD for the specific portfolio.
- (13) Loss rate = total impairment flow (specific and collective impairment flow) for a year / total EAD for the specific portfolio (including defaulted and non-defaulted assets but excluding securitisation and counterparty credit risk exposures).
- (14) All elements are reported net of tax effects.
- (15) The supervisory recognised capital ratio computed on the basis of additional mitigating measures presented in this section. The ratio is based primarily on the EBA definition, but may include other mitigating measures not recognised by the EBA methodology as having impacts in the Core Tier 1 capital, but which are considered by the national supervisory authorities as appropriate mitigating measures for the stressed conditions. Where applicable, such measures are explained in the additional announcements issued by banks/national supervisory authorities. Details of all mitigating measures are presented in the worksheet "3 - Mitigating measures).

Deferred tax assets (2)	2,916	0.6%	As referred to in paragraph 69 of BCBS publication dated December 2010 : "Basel 3 – a global regulatory framework for more resilient banks and banking systems"
Minority interests (excluding hybrid instruments) (2)	3,393	0.7%	Gross amount of minority interests as defined by Article 65 1. (a) of Directive 2006/48/EC
Valuation differences eligible as original own funds (-/+) (3)	-	0.0%	COREP line 1.1.2.6

Notes and definitions

(1) The amount is already included in the computation of the eligible capital and reserves and it is provided separately for information purposes.

(2) According to the Basel 3 framework specific rules apply for the treatment of these items under the Basel 3 framework, no full deduction is required for the computation of common equity.

(3) This item represents the impact in original own funds of valuation differences arising from the application of fair value measurement to certain financial instruments (AFS/FVO) and property assets after the application of prudential filters.

**Results of the 2011 EBA EU-wide stress test:
Overview of mitigating measures (1-2)**

Name of the bank: Barclays

Use of countercyclical provisions, divestments and other management actions

<i>Please fill in the table using a separate row for each measure</i>	Narrative description	Date of completion (actual or planned for future issuances)	Capital / P&L impact (in million EUR)	RWA impact (in million EUR)	Capital ratio impact (as of 31 December 2012) %
A) Use of provisions and/or other reserves (including release of countercyclical provisions), (3)					
B) Divestments and other management actions taken by 30 April 2011					
1)					
C) Other disinvestments and restructuring measures, including also future mandatory restructuring not yet approved with the EU Commission under the EU State Aid rules					
1)					

Future capital raisings and other back stop measures

<i>Please fill in the table using a separate row for each measure</i>	Date of issuance (actual or planned for future issuances, dd/mm/yy)	Amount	Maturity	Loss absorbency in going concern	Flexibility of payments (capacity to suspend the payments)	Permanence (Undated and without incentive to redeem)	Conversion clause (where appropriate)			
		(in million EUR)	(dated/undated) (4)	(Yes/No)	(Yes/No)	(Yes/No)	Nature of conversion	Date of conversion	Triggers	Conversion in common equity
D) Future planned issuances of common equity instruments (private issuances)										
E) Future planned government subscriptions of capital instruments (including hybrids)										
1) Denomination of the instrument										
F) Other (existing and future) instruments recognised as back stop measures by national supervisory authorities (including hybrids)										
1) Denomination of the instrument										

Notes and definitions

(1) The order of the measures follows the order of mitigating measures reported in the Section D of the worksheet "1 - Aggregate information".

(2) All elements are reported net of tax effects.

(3) If under the national legislation, the release of countercyclical provisions and/or other similar reserves is allowed, this figure for 2010 could be included either in rows "Impairments on financial assets in the banking book" or "Other income" for 2010, whereas under the EU-wide stress test methodology such release for 2011-2012 should be reported in Section D of the worksheet "1- Aggregate information" as other mitigating measures and explained in this worksheet.

(4) If dated please insert the maturity date (dd/mm/yy) otherwise specify undated.

Results of the 2011 EBA EU-wide stress test: Credit risk exposures (EAD - exposure at default), as of 31 December 2010, mln EUR, (1-5)

Notes and definitions

(1) EAD - Exposure at Default or exposure value in the meaning of the CRD.

(2) The EAD reported here are based on the methodologies and portfolio breakdowns used in the 2011 EU-wide stress test, and hence may differ from the EAD reported by banks in their Pillar 3 disclosures, which can vary based on national regulation. For example, this would affect breakdown of EAD for real estate exposures and SME exposures.

(3) Breakdown by country and macro area (e.g. Asia) when EAD >=5%. In any case coverage 100% of total EAD should be ensured (if exact mapping of some exposures to geographies is not possible, they should be allocated to the group "others").

(4) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See:

<http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(5) Residential real estate property which is or will be occupied or let by the owner, or the beneficial owner in the case of personal investment companies, and commercial real estate property, that is, offices and other commercial premises, which are recognised as eligible collateral in the meaning of the CRD, with the following criteria, which need to be met:

(a) the value of the property does not materially depend upon the credit quality of the obligor. This requirement does not preclude situations where purely macro economic factors affect both the value of the property and the performance of the borrower; and
 (b) the risk of the borrower does not materially depend upon the performance of the underlying property or project, but rather on the underlying capacity of the borrower to repay the debt from other sources. As such, repayment of the facility does not materially depend on any cash flow generated by the underlying property serving as collateral.

(6) Loan to value ratio - ratio of EAD to the market value of real estate used as collateral for such exposures. Given the different methodologies applied to assessing the value, the bank is required to explain the computation of the ratio. In particular (a) whether collateral values is marked-to-market or any other valuation method is used, (b) whether the amount has been adjusted for principal repayments, and (c) how guarantees other than the underlying property are treated.

Definition of Loan to Value ratio used:

Residential Mortgages: Defined as the amount borrowed secured by residential property as a percentage of the appraised value.

Commercial Real Estate: Based on internal management estimates, defined as the ratio of nominal loan balance secured by commercial property to the appraised value of the property.

(7) Total exposures is the total EAD according to the CRD definition based on which the bank computes RWA for credit risk. Total exposures, in addition to the exposures broken down by regulatory portfolios in this table, include EAD for securitisation transactions, counterparty credit risk, sovereigns, guaranteed by sovereigns, public sector entities and central banks.

Results of the 2011 EBA EU-wide stress test: Exposures to sovereigns (central and local governments), as of 31 December 2010, mIn EUR (1,2)

Notes and definitions

(1) The allocation of countries and exposures to macro areas and emerging/non-emerging is according to the IMF WEO country groupings. See: <http://www.imf.org/external/pubs/ft/weo/2010/01/weodata/groups.htm>

(2) The exposures reported in this worksheet cover only exposures to central and local governments on immediate borrower basis, and do not include exposures to other counterparties with full or partial government guarantees (such exposures are however included in the total EAD reported in the worksheet "4 - EADs").

(3) According to the EBA methodologies, for the trading book assets banks have been allowed to offset only cash short positions having the same maturities (paragraph 202 of the Methodological note).
