Pillar 3	Page
Summary	
KM1 – Key Metrics (Leverage)	3

## Disclosure Background

Barclays Capital Securities Limited (BCSL) is a large non-listed subsidiary of Barclays PLC and is required by the Prudential Regulation Authority (PRA) to provide information about its risk profile, including its regulatory capital, risk weighted assets (RWA) and leverage exposures.

From 1 January 2023, as mandated by the amended SS45/15, BCSL became subject to UK Leverage Ratio disclosure requirements on an individual basis. As a result, BCSL is required to disclose key metrics pertaining to Leverage on a quarterly basis in addition to the existing annual disclosure requirements.

The abbreviations ‘£m’ represent millions of Pounds Sterling.

There are a number of key judgement areas, for example impairment calculations, which are based on models and which are subject to ongoing adjustment and modifications. Reported numbers reflect best estimates and judgements at the given point in time.

Relevant terms that are used in this document but are not defined under applicable regulatory guidance or International Financial Reporting Standards (IFRS) are explained in the results glossary available at [home.barclays/investor-relations/reports-and-events](https://home.barclays/investor-relations/reports-and-events)

The disclosures included in this report reflect BCSL’s interpretation of the current rules and guidance.

## Summary

**Table 1: KM1 - Key metrics - Leverage**

KM1 ref	LR 2 Ref		As at 30.06.24 £000's	As at 31.03.24 £000's	As at 31.12.23 £000's	As at 30.09.23 £000's	As at 30.06.23 £000's

### Notes

1. BCSL does not apply any transitional arrangements of UK CRR.

2. Average UK leverage ratio uses capital based on the last day of each month in the quarter and an exposure measure for each day in the quarter.

The UK leverage ratio remained broadly stable at 4.5% (December 2023: 4.5%). Leverage exposure has marginally increased by £399m to £49,706m (December 2023: £49,307m).
