FINAL REDEMPTION

If the Securities have not redeemed early they will redeem on the Scheduled Redemption Date at an amount that is dependent on each of the following:

- The 'Initial Price' of the Worst Performing Underlying Asset, which reflects the price or level of that asset near the issue date of the Securities;
- 'Final Valuation Price' of the Worst Performing Underlying Asset, which reflects the price or level of that asset near the Scheduled Redemption Date;
- The 'Strike Price' of the Worst Performing Underlying Asset, which is calculated as 100% multiplied by the Initial Price of that asset;
- The 'Knock-in Barrier Price' of the Worst Performing Underlying Asset, which is calculated as 70% multiplied by the Initial Price of that asset.

Initial Price: The Initial Price of each Underlying Asset is the closing price or level of such Underlying Asset on Initial Valuation Date.

Final Valuation Price: The Final Valuation Price of each Underlying Asset is the closing price or level of such Underlying Asset on 23 August 2018 (the "Final Valuation Date").

Worst Performing Underlying Asset: The Knock-in Barrier Price, Initial Price, Final Valuation Price and Strike Price to be considered for the purposes of determining the final redemption amount will be the Knock-in Barrier Price, Initial Price, Final Valuation Price or Strike Price of the Underlying Asset with the lowest Performance. The 'Performance' of each Underlying Asset is calculated by dividing the Final Valuation Price of an asset by its Initial Price.

European Barrier redemption: If the Final Valuation Price is greater than or equal to the Knock-in Barrier Price, you will receive a cash amount per Calculation Amount equal to EUR 1,000. Otherwise:

		you will receive a cash amount per Calculation Amount, calculated by dividing the Final Valuation Price by the Strike Price and multiplying the result by the Calculation Amount.

Section D – Risks

D.2	Key information on the key risks that are specific to the Issuer	<p>Credit Risk: The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss where the downgrading of an entity's credit rating causes a fall in the value of the Issuer's investment in that entity's financial instruments.</p> <p>Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer's main business markets (being Europe and the United States) have been marked by generally weaker than expected growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries may exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the outcome of such an event and to accurately quantify the impact of such event on the Issuer's profitability, liquidity and capital. If some or all of these conditions persist or worsen, they may have a material adverse effect on the Issuer's operations, financial condition and prospects.</p> <p>Market risk: The Issuer may suffer financial loss if the Issuer is unable to adequately hedge its balance sheet. This could occur as a result of low market liquidity levels, or if there are unexpected or volatile changes in interest rates, credit spreads, commodity prices, equity prices and/or foreign exchange rates.</p> <p>Liquidity risk: The Issuer is exposed to the risk that it may be unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.</p> <p>Capital risk: The Issuer may be unable to maintain appropriate capital ratios, which could lead to: (i) an inability to support business activity; (ii) a failure to meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased regulatory capital requirements and changes to what constitutes capital may constrain the Issuer's planned activities and could increase costs and contribute to adverse impacts on the Issuer's earnings.</p> <p>Legal and Regulatory-related risk: Non-compliance by the Issuer with applicable laws, regulations and codes relevant to the financial services industry could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal of authorisations to operate.</p> <p>Reputation Risk: Reputational damage reduces – directly or indirectly – the attractiveness of the Issuer to stakeholders and may lead to negative publicity, loss of revenue, litigation, regulatory or</p>
-----	---	---

		<p>legislative action, loss of existing or potential client business, reduced workforce morale, and difficulties in recruiting talent. Sustained reputational damage could have a materially negative impact on the Issuer's licence to operate and the value of the Issuer's franchise which in turn could negatively affect the Issuer's profitability and financial condition.</p> <p>Infrastructure Resilience, Technology and Cyberspace risk: The Issuer is exposed to risks from cyberspace to its systems. If customer or proprietary information held on, and/or transactions processed through these systems, is breached, there could be a materially negative impact on the Issuer's performance or reputation.</p> <p>Taxation risk: The Issuer may suffer losses arising from additional tax charges, other financial costs or reputational damage due to: failure to comply with or correctly assess the application of, relevant tax law; failure to deal with tax authorities in a timely, transparent and effective manner; incorrect calculation of tax estimates for reported and forecast tax numbers; or provision of incorrect tax advice.</p>
D.6	<p>Key information on the key risks that are specific to the Securities; and risk warning that investors may lose value of entire investment</p>	<p>Investors in Securities may lose up to the entire value of their investment:</p> <p>The investor is exposed to the credit risk of the Issuer and will lose up to the entire value of their investment if the Issuer goes bankrupt or is otherwise unable to meet its payment obligations.</p> <p>Investors may also lose the value of their entire investment, or part of it, if:</p> <ul style="list-style-type: none"> • the Underlying Assets perform in such a manner that the redemption amount payable to investors (whether at maturity or following any early redemption) is less than the initial purchase price; • investors sell their Securities prior to maturity in the secondary market at an amount that is less than the initial purchase price; • the Securities are redeemed early for reasons beyond the control of the Issuer (such as following an additional disruption event) and the amount paid to investors is less than the initial purchase price; and/or • the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to investors and/or the value of the Securities is reduced. <p>Return linked to performance of Underlying Assets: The return payable on the Securities is linked to the change in value of the Underlying Assets over the life of the Securities. Any information about the past performance of any Underlying Asset should not be taken as an indication of how prices will change in the future. Investors will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of any Underlying Asset.</p>

		<p>Worst-of: Investors are exposed to the performance of every Underlying Asset. Irrespective of how the other Underlying Assets perform, <i>if any one or more</i> Underlying Assets fail to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, investors might receive no interest payments and/or could lose some or all of their initial investment.</p> <p>Volatile market prices: The market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p>
