Determination Agent: Barclays Bank PLC (the "Determination Agent") will be appointed to make calculations and determinations with respect to the Warrants.

EXERCISE

If the Warrants have not been cancelled early and if the settlement value of the Warrants (the "Settlement Value") is greater than the exercise price (the "Exercise Price"), the Warrants will be automatically exercised by the Issuer on the Exercise Date (being 30 September 2019). If the Settlement Value is not greater than the Exercise Price, the Warrants will be cancelled without exercise on the Exercise Date and no amount or entitlement will be payable or deliverable to investors.

The Exercise Price for this issue of Warrants is GBP 2,500.

The Settlement Value impacts the amount which is payable or the entitlement which is deliverable upon exercise. The Settlement Value will be calculated as the Exercise Price plus an amount dependent on the price or level of the Underlying Asset on one or more specified dates during the life of the Warrants. In particular, the Settlement Value will depend on the following:

- The Exercise Price, being GBP 2,500;
- The "Initial Price" of the Underlying Asset, which reflects the price or level of that Underlying Asset near the issue date of the Warrants and is used as the reference point for determining the performance of any investment; and
- The "Final Valuation Price" of the Underlying Asset, which reflects the price or level of that Underlying Asset on or near the Exercise Date.
- The "Strike Price" of the Underlying Asset, which is calculated as 100% multiplied by the Initial Price of that Underlying Asset;
- The "Final Barrier" of the Underlying Asset, which is calculated as 100% multiplied by the Initial Price of that Underlying Asset;
- The "Knock-in Barrier Price" of the Underlying Asset, which is calculated as 50% multiplied by the Initial Price of that Underlying Asset.

Initial Price: The Initial Price of the Underlying Asset is the closing price or level of the Underlying Asset on 30 September 2013, as determined by the Determination Agent

Final Valuation Price: The Final Valuation Price of the Underlying Asset is the closing price or level of the Underlying Asset on 30 September 2019, as determined by the Determination Agent.

Calculation of the Settlement Value

There are several threshold levels which will affect the calculation of the Settlement Value. In particular, the Settlement Value will be calculated differently depending on whether or not the price or level of the Underlying Asset on certain dates is equal to, above or below certain specified threshold levels. In other words, the Settlement Value will be calculated differently depending on whether or not the performance of the Underlying Asset satisfies certain "threshold tests".

The first threshold test for this issue of Warrants is whether or not:

The Final Valuation Price of the Underlying Asset is greater than or equal to the **Final Barrier** of the Underlying Asset.

If the first threshold test is satisfied, the Settlement Value will be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500 per Warrant), plus (ii) the Final Autocall Settlement Percentage (being 151.00%) multiplied by the Calculation Amount (being GBP 25,000).

If the first threshold test is not satisfied, a *second* threshold test will be considered:

The second threshold test for this issue of Warrants is whether or not:

The Final Valuation Price of the Underlying Asset is greater than or equal to the **Knock-in Barrier Price** of the Underlying Asset.

If the second threshold test is satisfied, the Settlement Value will be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500 per Warrant), plus (ii) 100% multiplied by the Calculation Amount (being GBP 25,000).

If the second threshold test is not satisfied, the Settlement Value will instead be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500), plus (ii) the Final Valuation Price of the Underlying Asset divided by the Strike Price of the Underlying Asset and then multiplied by the Calculation Amount (being GBP 25,000).

Settlement

Following exercise of the Warrants and provided that all conditions to settlement have been fulfilled by investors (including payment of any Exercise Price), investors will receive, per Calculation Amount:

a cash amount per Calculation Amount equal to the Settlement Value payable on the day falling 5 business days after the Exercise Date.

EARLY CANCELLATION FOLLOWING AN AUTOCALL EVENT

If the closing price or level of the Underlying Asset is greater than or equal to its corresponding Autocall Barrier on any Autocall Valuation Date, the Warrants will be automatically cancelled prior to the exercise date and each investor will receive (per Calculation Amount):

a cash amount equal to the Autocall Early Cash Settlement Percentage as specified in the table below multiplied by the Calculation Amount (being GBP 25,000), payable on the relevant Autocall Early Cancellation Date.

The "Autocall Barrier" of the Underlying Asset is calculated as the Autocall Barrier Percentage specified in the table below multiplied by the Initial Price of the Underlying Asset.

Each Autocall Valuation Date and the corresponding Autocall Early Cancellation Date, Autocall Barrier and Autocall Early Cash Settlement Percentage is specified in the table below:

Autocall Valuation Date	Autocall Early Cancellation Date	Autocall Barrier Percentage	Autocall Early Cash Settlement Percentage
30 September 2014	7 October 2014	100.00%	108.50%
30 September 2015	7 October 2015	100.00%	117.00%
30 September 2016	7 October 2016	100.00%	125.50%
2 October 2017	9 October 2017	100.00%	134.00%
1 October 2018	8 October 2018	100.00%	142.50%

OPTIONAL EARLY CANCELLATION

C.16	Expiration or maturity date of the Warrants	<p>The Warrants are scheduled to be exercisable on the exercise date (the "Exercise Date"). This day is subject to postponement in circumstances where any day on which a valuation is scheduled to take place is a disrupted day.</p> <p>The Exercise Date of this issue of Warrants is the Final Valuation Date, which is scheduled to be 30 September 2019.</p>

Section D – Risks		
D.2	Key information on the key risks that are specific to the Issuer	<p>Credit Risk: The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss where the downgrading of an entity's credit rating causes a fall in the value of the Issuer's investment in that entity's financial instruments.</p> <p>Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer's main business markets (being Europe and the United States) have been marked by generally weaker than expected</p>

		<p>growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries may exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the outcome of such an event and to accurately quantify the impact of such event on the Issuer's profitability, liquidity and capital. If some or all of these conditions persist or worsen, they may have a material adverse effect on the Issuer's operations, financial condition and prospects.</p> <p>Market risk: The Issuer may suffer financial loss if the Issuer is unable to adequately hedge its balance sheet. This could occur as a result of low market liquidity levels, or if there are unexpected or volatile changes in interest rates, credit spreads, commodity prices, equity prices and/or foreign exchange rates.</p> <p>Liquidity risk: The Issuer is exposed to the risk that it may be unable to meet its obligations as they fall due as a result of a sudden, and potentially protracted, increase in net cash outflows. These outflows could be principally through customer withdrawals, wholesale counterparties removing financing, collateral posting requirements or loan draw-downs.</p> <p>Capital risk: The Issuer may be unable to maintain appropriate capital ratios, which could lead to: (i) an inability to support business activity; (ii) a failure to meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased regulatory capital requirements and changes to what constitutes capital may constrain the Issuer's planned activities and could increase costs and contribute to adverse impacts on the Issuer's earnings.</p> <p>Legal and Regulatory-related risk: Non-compliance by the Issuer with applicable laws, regulations and codes relevant to the financial services industry could lead to fines, public reprimands, damage to reputation, increased prudential requirements, enforced suspension of operations or, in extreme cases, withdrawal of authorisations to operate.</p> <p>Reputation Risk: Reputational damage reduces – directly or indirectly – the attractiveness of the Issuer to stakeholders and may lead to negative publicity, loss of revenue, litigation, regulatory or legislative action, loss of existing or potential client business, reduced workforce morale, and difficulties in recruiting talent. Sustained reputational damage could have a materially negative impact on the Issuer's licence to operate and the value of the Issuer's franchise, which in turn could negatively affect the Issuer's profitability and financial condition.</p> <p>Infrastructure Resilience, Technology and Cyberspace risk: The Issuer is exposed to risks from cyberspace to its systems. If customer or proprietary information held on, and/or transactions processed through these systems, is breached, there could be a materially negative impact on the Issuer's performance or reputation.</p> <p>Taxation risk: The Issuer may suffer losses arising from additional tax charges, other financial costs or reputational damage due to: failure to comply with or correctly assess the application of, relevant tax law; failure to deal with tax authorities in a timely, transparent and effective manner; incorrect calculation of tax estimates for reported and forecast tax numbers; or provision of incorrect tax advice.</p>
D.6	<p>Key information on the key risks that are specific to the Warrants; and risk warning that investors may lose value of entire investment</p>	<p>Investors in Warrants may lose up to the entire value of their investment.</p> <p>The investor is exposed to the credit risk of the Issuer and will lose up to the entire value of their investment if the Issuer goes bankrupt or is otherwise unable to meet its payment obligations.</p> <p>Investors may also lose the value of their entire investment, or part of it, if:</p> <ul style="list-style-type: none"> • the Underlying Asset performs in such a manner that the settlement amount or entitlement payable or deliverable to investors (whether at exercise or following any early cancellation, and including after deduction of any applicable taxes and expenses) is less than the initial purchase price; • investors sell their Warrants prior to scheduled exercise in the secondary market at an amount that is less than the initial purchase price;

		<ul style="list-style-type: none"> the Warrants are cancelled early for reasons beyond the control of the Issuer (such as following an additional disruption event) and the amount paid to investors is less than the initial purchase price; and/or the terms and conditions of the Warrants are adjusted (in accordance with the terms and conditions of the Warrants) with the result that the settlement amount payable to investors and/or the value of the Warrants is reduced. <p>Conditions to settlement: payment of any settlement amount or delivery of any settlement entitlement is subject to satisfaction of all conditions to settlement by the investor, including payment of any Exercise Price and/or taxes due with respect to the Warrants. If an investor fails to comply with these conditions, the obligations of the Issuer to that investor may be discharged without any payment or delivery being made.</p> <p>Volatile market prices: the market value of the Warrants is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Warrants are scheduled to exercise; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p> <p>Return linked to performance of one or more Underlying Assets: The return on the Warrants is linked to the change in value of the Underlying Asset over the life of the Warrants. Any information about the past performance of the Underlying Asset should not be taken as an indication of how prices will change in the future. Investors will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of the Underlying Asset.</p>
