10 Index Linked Warrants due October 2020 ("Tranche 1")
Issue Price: GBP 25,000 per Warrant

This document constitutes the final terms of the Warrants (the "Final Terms") described herein for the purposes of Article 5.4 of the Prospectus Directive and is prepared in connection with the Global Structured Securities Programme established by Barclays Bank PLC (the "Issuer"). These Final Terms are supplemental to and should be read in conjunction with the GSSP Base Prospectus 6 dated 12 June 2014, as supplemented on 8 July 2014, 18 July 2014 and 1 September 2014 (the "Base Prospectus"), which constitutes a base prospectus for the purpose of the Prospectus Directive. Full information on the Issuer and the offer of the Warrants is only available on the basis of the combination of these Final Terms and the Base Prospectus. A summary of the individual issue of the Warrants is annexed to these Final Terms. Words and expressions defined in the Base Prospectus and not defined in this document shall bear the same meanings when used herein.

The Base Prospectus and any supplements thereto are available for viewing at http://irreports.barclays.com/prospectuses-and-documentation/structured-securities/prospectuses and during normal business hours at the registered office of the Issuer and the specified office of the Issue and Paying Agent for the time being in London, and copies may be obtained from such office.

affecting the Issuer and industries in which the Issuer operates

the "Bank Group" or "Barclays") can be affected by the fiscal or other policies and other actions of various governmental and regulatory authorities in the UK, EU, U.S. and elsewhere, which are all subject to change. The regulatory response to the financial crisis has led and will continue to lead to very substantial regulatory changes in the UK, EU and U.S. and in other countries in which the Bank Group operates. It has also (amongst other things) led to (i) a more assertive approach being demonstrated by the authorities in many jurisdictions; and (ii) enhanced capital and liquidity requirements (for example pursuant to the fourth Capital Requirements Directive (CRD IV)). Any future regulatory changes may restrict the Bank Group’s operations, mandate certain lending activity and impose other, significant compliance costs.

Known trends affecting the Issuer and the industry in which the Issuer operates include:

- continuing political and regulatory scrutiny of the banking industry which is leading to increased or changing regulation that is likely to have a significant effect on the industry;
- general changes in regulatory requirements, for example, prudential rules relating to the capital adequacy framework and rules designed to promote financial stability and increase depositor protection;
- the U.S. Dodd-Frank Wall Street Reform and Consumer Protection Act, which contains far reaching regulatory reform (including restrictions on proprietary trading and fund-related activities (the so-called "Volcker rule")
- recommendations by the Independent Commission on Banking including: (i) that the UK and EEA retail banking activities of the largest UK banks should be placed in a legally, operationally and economically separate independent entity (so-called "ring-fencing"); (ii) statutory depositor preference in insolvency; and (iii) a reserve power for the Prudential Regulatory Authority to enforce full separation of the retail operations of UK banks to which the reforms apply under certain circumstances;
- investigations by the Office of Fair Trading into Visa and MasterCard credit and debit interchange rates, which may have an impact on the consumer credit industry;
- investigations by (i) regulatory bodies in the UK, EU and U.S. into submissions made by the Issuer and other panel members to the bodies that set various interbank offered rates such as the London Interbank Offered Rate ("LIBOR) and the Euro Interbank Offered Rate ("EURIBOR) and (ii) regulatory bodies in the UK and U.S. into historical practices with respect to ISDAfix, amongst other benchmarks; and
- changes in competition and pricing environments.

The return on, and value of, Warrants will be linked to the performance of: (i) one or more specified equity indices, shares, depository receipts and/or funds; or (ii) one or more specified commodities and/or commodity indices (each, an "Underlying Asset").

The Underlying Asset for this issue of Warrants is the FTSE 100 Index.

Calculations in respect of amounts payable under the Warrants are made by reference to a "Calculation Amount", being GBP 25,000.

**Determination Agent**: Barclays Bank PLC (the "Determination Agent") will be appointed to make calculations and determinations with respect to the Warrants.

**Exercise**:

If the Warrants have not been cancelled early and if the settlement value of the Warrants (the "Settlement Value") is greater than the exercise price (the "Exercise Price"), the Warrants will be automatically exercised by the Issuer on the Exercise Date (being 30 September 2020). If the Settlement Value is not greater than the Exercise Price, the Warrants will be cancelled without exercise on the Exercise Date and no amount or entitlement will be payable or deliverable to investors.

The Exercise Price for this issue of Warrants is GBP 2,500.

The Settlement Value impacts the amount which is payable or the entitlement which is deliverable upon exercise. The Settlement Value will be calculated as the Exercise Price plus an amount dependent on the price or level of the Underlying Asset on one or more specified dates during the life of the Warrants. In particular, the Settlement Value will depend on the following:

- The Exercise Price, being GBP 2,500;
- The "Initial Price" of the Underlying Asset, which reflects the price or level of that Underlying Asset near the issue date of the Warrants and is used as the reference point for determining the performance of any investment; and
- The "Final Valuation Price" of the Underlying Asset, which reflects the price or level of that Underlying Asset on or near the Exercise Date.
- The "Strike Price" of the Underlying Asset, which is calculated as 100.00% multiplied by the Initial Price of that Underlying Asset;
- The "Final Barrier" of the Underlying Asset, which is calculated as 100.00% multiplied by the Initial Price of that Underlying Asset;
- The "Knock-in Barrier Price" of the Underlying Asset, which is calculated as 50.00% multiplied by the Initial Price of that Underlying Asset;

**Initial Price**: The Initial Price of the Underlying Asset is the closing price or level of the Underlying Asset on 30 September 2014, as determined by the Determination Agent.

**Final Valuation Price**: The Final Valuation Price of the Underlying Asset is the closing price or level of the Underlying Asset on 30 September 2020, as
determined by the Determination Agent.

Calculation of the Settlement Value

There are several threshold levels which will affect the calculation of the Settlement Value. In particular, the Settlement Value will be calculated differently depending on whether or not the price or level of the Underlying Asset on certain dates is equal to, above or below certain specified threshold levels. In other words, the Settlement Value will be calculated differently depending on whether or not the performance of the Underlying Asset satisfies certain "threshold tests".

The first threshold test for this issue of Warrants is whether or not:

The Final Valuation Price of the Underlying Asset is greater than or equal to the Final Barrier of the Underlying Asset.

If the first threshold test is satisfied, the Settlement Value will be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500 per Warrant), plus
(ii) the Final Autocall Settlement Percentage (being 143.50%) multiplied by the Calculation Amount (being GBP 25,000)

If the first threshold test is not satisfied, a second threshold test will be considered:

The second threshold test for this issue of Warrants is whether or not:

The Final Valuation Price of the Underlying Asset is greater than or equal to the Knock-in Barrier Price of the Underlying Asset.

If the second threshold test is satisfied, the Settlement Value will be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500 per Warrant), plus
(ii) 100% multiplied by the Calculation Amount (being GBP 25,000).

If the second threshold test is not satisfied, the Settlement Value will instead be calculated as follows:

Settlement Value = (i) the Exercise Price (being GBP 2,500), plus (ii) the Final Valuation Price of the Underlying Asset divided by the Strike Price of the Underlying Asset and then multiplied by the Calculation Amount (being GBP 25,000).

Settlement

Following exercise of the Warrants and provided that all conditions to settlement have been fulfilled by investors (including payment of any Exercise Price), investors will receive, per Calculation Amount:
a cash amount per Calculation Amount equal to the Settlement Value payable on 7 October 2020.

Early cancellation following an autocall event: If the closing price or level of the Underlying Asset is greater than or equal to its corresponding Autocall Barrier on any Autocall Valuation Date, the Warrants will be automatically cancelled prior to the exercise date and each investor will receive (per Calculation Amount):
a cash amount equal to the Autocall Early Cash Settlement Percentage as specified in the table below multiplied by the Calculation Amount (being GBP
25,000), payable on the relevant Autocall Early Cancellation Date. The “Autocall Barrier” of the Underlying Asset is calculated as the Autocall Barrier Percentage specified in the table below multiplied by the Initial Price of the Underlying Asset.

Each Autocall Valuation Date and the corresponding Autocall Early Cancellation Date, Autocall Barrier and Autocall Early Cash Settlement Percentage is specified in the table below:

**OPTIONAL EARLY CANCELLATION**

**Issuer Early Cancellation Option:** The Issuer may elect to cancel all of the Warrants (in whole only) on the 5th business day following the Issue Date by giving notice to investors on the business day following the Issue Date.

Following the exercise of this option, the Warrants will be cancelled and investors will receive a cash payment per Calculation Amount equal to the issue price of the Warrants (being GBP 25,000 per Warrant).

**Investor Early Cancellation Option:** An investor may elect to cancel a Warrant (in whole only) on the 5th business day following the Issue Date by giving notice to the Issuer on the business day following the Issue Date.

Following the exercise of this option, the Warrants will be cancelled and investors will receive a cash payment per Calculation Amount equal to the issue price of the Warrants (being GBP 25,000 per Warrant).

**C.16 Expiration date of the Warrants**

The Warrants are scheduled to be exercisable on the exercise date (the “Exercise Date”). This day is subject to postponement in circumstances where any day on which a valuation is scheduled to take place is a disrupted day.

The Exercise Date of this issue of Warrants is the final valuation date, which is scheduled to be 30 September 2020.

**C.17 Settlement procedure for derivative Warrants**

Warrants will be delivered on the specified issue date either against payment of the issue price or free of payment of the issue price of the Warrants. The Warrants may be cleared and settled through Euroclear Bank S.A./N.V., or Clearstream Banking société anonyme. The Warrants will initially be issued in global registered form.

The Warrants will be delivered on 4 September 2014 (the “Issue Date”) free of payment of the issue price of the Warrants.
| C.18 | Description of how the return on derivative warrants takes place | The return on, and value of, the Warrants will be linked to the performance of the Underlying Asset. The performance of the Underlying Asset will affect: (i) whether the Warrants are automatically cancelled early and the amount paid on early cancellation; and (ii) if the Warrants are not cancelled early, the amount paid or delivered on exercise. **Exercise:** Following exercise of the Warrants, investors will receive, per Calculation Amount: payment of a cash amount equal to the Settlement Value payable on the day falling 5 business days after the Exercise Date. **Automatic Early Cancellation:** Following any automatic early cancellation due to an autocall event, the Warrants will be settled by: payment of a cash amount on the relevant Autocall Early Cancellation Date. **Issuer Early Cancellation Option:** If the Issuer exercises its right to cancel the Warrants on the business day following the Issue Date, settlement will be made by cash payment per Calculation Amount equal to the issue price of the Warrants (being GBP 25,000) on a specified payment date. **Investor Early Cancellation Option:** If an investor exercises its right to cancel any Warrants on the business day following the Issue Date, settlement will be made by cash payment per Calculation Amount equal to the issue price of the Warrants (being GBP 25,000) on a specified payment date. |
| C.19 | Final reference price of the underlying | The final valuation price of the Underlying Asset is the closing price or level of such Underlying Asset on 30 September 2020, as determined by the Determination Agent. |
| C.20 | Type of underlying | The Underlying Asset is: The FTSE 100 Index Information about the Underlying Asset is available at: Reuters page .FTSE |

### Section D – Risks

| D.2 | Key information on the key risks that are specific to the Issuer | **Credit risk:** The Issuer is exposed to the risk of suffering loss if any of its customers, clients or market counterparties fails to fulfil its contractual obligations. The Issuer may also suffer loss where the downgrading of an entity’s credit rating causes a fall in the value of the Issuer’s investment in that entity’s financial instruments. Weak or deteriorating economic conditions negatively impact these counterparty and credit-related risks. In recent times, the economic environment in the Issuer’s main business markets (being Europe and the United States) has been marked by generally weaker than expected growth, increased unemployment, depressed housing prices, reduced business confidence, rising inflation and contracting GDP. Operations in the Eurozone remain affected by the ongoing sovereign debt crisis, the stresses being exerted on the financial system and the risk that one or more countries may exit the Euro. The current absence of a predetermined mechanism for a member state to exit the Euro means that it is not possible to predict the |

22503631v1
outcome of such an event and to accurately quantify the impact of such event on
the Issuer's profitability, liquidity and capital. If some or all of these conditions
persist or worsen, they may have a material adverse effect on the Issuer's
operations, financial condition and prospects.

**Liquidity risk:** The Issuer is exposed to the risk that it may be unable to meet its
obligations as they fall due as a result of a sudden, and potentially protracted,
increase in net cash outflows. These outflows could be principally through
customer withdrawals, wholesale counterparties removing financing, collateral
posting requirements or loan draw-downs.

**Capital risk:** The Issuer may be unable to maintain appropriate capital ratios,
which could lead to: (i) an inability to support business activity; (ii) a failure to
meet regulatory requirements; and/or (iii) credit ratings downgrades. Increased
regulatory capital requirements and changes to what constitutes capital may
constrain the Issuer's planned activities and could increase costs and contribute to
adverse impacts on the Issuer's earnings.

**Legal and regulatory-related risk:** Non-compliance by the Issuer with applicable
laws, regulations and codes relevant to the financial services industry could lead
to fines, public reprimands, damage to reputation, increased prudential
requirements, enforced suspension of operations or, in extreme cases, withdrawal
of authorisations to operate.

**Reputation risk:** Reputational damage reduces – directly or indirectly – the
attractiveness of the Issuer to stakeholders and may lead to negative publicity,
loss of revenue, litigation, regulatory or legislative action, loss of existing or
potential client business, reduced workforce morale, and difficulties in recruiting
talent. Sustained reputational damage could have a materially negative impact on
the Issuer's licence to operate and the value of the Issuer's franchise, which in turn
could negatively affect the Issuer's profitability and financial condition.

• the terms and conditions of the Warrants are adjusted (in accordance with the terms and conditions of the Warrants) with the result that the settlement amount payable to you and/or the value of the Warrants is reduced.

Return linked to performance of one or more Underlying Assets: The return on the Warrants is linked to the change in value of the Underlying Asset(s) over the life of the Warrants. Any information about the past performance of the Underlying Asset(s) should not be taken as an indication of how prices will change in the future. You will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of the Underlying Asset(s).

Conditions to settlement: payment of any settlement amount or delivery of any settlement entitlement is subject to satisfaction of all conditions to settlement by you, including payment of any Exercise Price and/or taxes due with respect to the Warrants. If you fail to comply with these conditions, the obligations of the Issuer to you may be discharged without any payment or delivery being made.

Reinvestment risk/loss of yield: Following an early cancellation of the Warrants for any reason, holders may be unable to reinvest the cancellation proceeds at a rate of return as high as the return on the Warrants being cancelled.

Equity Index risks: Warrants linked to the performance of equity indices provide investment diversification opportunities, but will be subject to the risk of fluctuations in both equity prices and the value and volatility of the relevant equity index. Warrants linked to equity indices may not participate in dividends or any other distributions paid on the shares which make up such indices, accordingly, you may receive a lower return on the Warrants than you would have received if you had invested directly in those shares.

The index sponsor can add, delete or substitute the components of an equity index at its discretion, and may also alter the methodology used to calculate the level of such index. These events may have a detrimental impact on the level of that index, which in turn could have a negative impact on the value of and return on the Warrants.

Volatile market prices: the market value of the Warrants is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in currency exchange rates; exchange controls; the time remaining until the Warrants are scheduled to exercise; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer’s creditworthiness or perceived creditworthiness.
