The regulatory response to the financial crisis has led and will continue to lead to very substantial regulatory changes in the UK, EU and US and in other countries in which the Bank Group operates. It has also (amongst other things) led to (i) a more assertive approach being demonstrated by the authorities in many jurisdictions, and (ii) enhanced capital, leverage, liquidity and funding requirements (for example pursuant to the fourth Capital Requirements Directive (CRD IV)). Any future

		<p>regulatory changes may restrict the Bank Group's operations, mandate certain lending activity and impose other, significant compliance costs.</p> <p>Known trends affecting the Issuer and the industry in which the Issuer operates include:</p> <ul style="list-style-type: none"> • continuing political and regulatory scrutiny of the banking industry which is leading to increased or changing regulation that is likely to have a significant effect on the structure and management of the Bank Group; • general changes in regulatory requirements, for example, prudential rules relating to the capital adequacy framework and rules designed to promote financial stability and increase depositor protection, increased regulation and procedures for the protection of customers and clients of financial services firms and an increased willingness on the part of regulators to investigate past practices, vigorously pursue alleged violations and impose heavy penalties on financial services firms; • increased levels of legal proceedings in jurisdictions in which the Bank Group does business, including in the form of class actions; • the US Dodd-Frank Wall Street Reform and Consumer Protection Act, which contains far-reaching regulatory reform (including restrictions on proprietary trading and fund-related activities (the so-called 'Volcker rule')); • the United Kingdom Financial Services (Banking Reform) Act 2013 which gives United Kingdom authorities powers to implement measures for, among others: (i) the separation of the United Kingdom and EEA retail banking activities of the largest United Kingdom banks into a legally, operationally and economically separate and independent entity (so-called 'ringfencing'); (ii) a statutory depositor preference in insolvency; and (iii) a 'bail-in' stabilisation option; and • changes in competition and pricing environments.

The interest amount payable on each Security on each Interest Payment Date for which the Interest Type in respect of the corresponding Interest Valuation Date is specified as Digital (Bullish with memory feature) will be calculated on each Interest Valuation Date and is calculated as follows:

- (i) If the Modified Performance is greater than or equal to the corresponding Interest Barrier Percentage, the interest amount is calculated as the sum of (a) the Fixed Interest Rate (being 1.90%) multiplied by the Calculation Amount, and (b) the number of previous Interest Valuation Dates in respect of which no interest was payable (after which interest shall be considered to have been payable in respect of such previous Interest Valuation Date(s)) multiplied by the Fixed Interest Rate and then multiplied by the Calculation Amount; or
- (ii) Otherwise, the interest amount is zero.

"Initial Price_(Interest)" means the closing price of the Underlying Asset on the Initial Valuation Date (being EUR 83.2905).

"Initial Valuation Date" means 31 May 2018, subject to adjustment.

"Interest Valuation Price" means, in respect of an Interest Valuation Date and an Underlying Asset, the closing price of such Underlying Asset on such Interest Valuation Date.

Section D – Risks		
D.2	Key information on the key risks that are specific to the Issuer	<p>The risks described below are material risks that senior management has identified with respect to the Group. In connection with the planned implementation in the first half of 2018 of ring-fencing certain of the Group's UK businesses, the Issuer will transfer what are materially the assets and business of the Barclays UK division to another subsidiary of the Group, Barclays Bank UK PLC (the "UK Ring-fenced Bank"). Senior management expects that upon this transfer the material risks with respect to the Bank Group will be the same in all material respects as those risks with respect to the Group.</p> <p>The Issuer classifies eight risks as "Principal Risks": (1) Credit Risk; (2) Market Risk; (3) Treasury and Capital Risk; (4) Operational Risk; (5) Model Risk; (6) Conduct Risk; (7) Reputation Risk; and (8) Legal Risk (each a "Principal Risk"). Material risks to the Group and their impact are described below in the sections (i) material existing and emerging risks potentially impacting more than one Principal Risk and (ii) material existing and emerging risks impacting individual Principal Risks.</p> <p>(i) Material existing and emerging risks potentially impacting more than one Principal Risk</p>

	<p>Business conditions, general economy and geopolitical issues</p> <p>The Group offers a broad range of services, including to retail, institutional and government customers, in a large number of countries. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where the Group is active, or in any systemically important economy, could adversely affect the Group's operating performance, financial condition and prospects.</p> <p>Interest rate rises adversely impacting credit conditions</p> <p>To the extent that central banks increase interest rates particularly in the Group's main markets, in the UK and the US, there could be an impact on consumer debt affordability and corporate profitability. While interest rate rises could positively impact the Group's profitability, as retail and corporate business income may increase due to margin de-compression, future interest rate increases, if larger or more frequent than expectations, could cause stress in the loan portfolio and underwriting activity of the Group. Higher credit losses driving an increased impairment allowance would most notably impact retail unsecured portfolios and wholesale non-investment grade lending.</p> <p>Interest rates rising faster than expected could also have an adverse impact on the value of high quality liquid assets which are part of the Group Treasury function's investment activity that could consequently create more volatility through the Group's available for sale reserves than expected.</p> <p>Process of UK withdrawal from the European Union</p> <p>The uncertainty and increased market volatility following the UK's decision to leave the EU in 2019 is likely to continue until the exact nature of the future trading relationship with the EU becomes clear. The potential risks associated with an exit from the EU include:</p> <ul style="list-style-type: none"> • Increased market risk with the impact on the value of trading book positions; • Potential for credit spread widening for UK institutions which could lead to reduced investor appetite for the Group's debt securities, which could negatively impact the cost of and/or access to funding; • Changes in the long-term outlook for UK interest rates which may adversely affect International Accounting Standards 19 pension liabilities and the market value of equity investments funding those liabilities; • Increased risk of a UK recession with lower growth, higher unemployment and falling UK house prices. This would negatively impact a number of the Group's portfolios; • Changes to current EU "Passporting" rights which will likely require adjustments to the current model for the Group's cross-border banking operation which could increase operational complexity and/or costs; • The ability to attract, or prevent the departure of, qualified and skilled employees may be impacted by the UK's future approach to the EU freedom of movement and immigration from the EU countries; and
--	---

	<ul style="list-style-type: none"> The legal framework within which the Group operates could change and become more uncertain as the UK takes steps to replace or repeal certain laws currently in force, which are based on EU legislation and regulation. <p>Regulatory change agenda and impact on business model</p> <p>The Group remains subject to ongoing significant levels of regulatory change and scrutiny in many of the countries in which it operates (including, in particular, the UK and the US). A more intensive regulatory approach and enhanced requirements together with the uncertainty (particularly in light of the UK's decision to withdraw from the EU) and potential lack of international regulatory coordination as enhanced supervisory standards are developed and implemented may adversely affect the Group's business, capital and risk management strategies and/or may result in the Group deciding to modify its legal entity structure, capital and funding structures and business mix, or to exit certain business activities altogether or not to expand in areas despite otherwise attractive potential.</p> <p>Certain potential consequences of ring-fencing to the Issuer</p> <p>In connection with the planned implementation in the first half of 2018 of ring-fencing certain of the Group's businesses, the Issuer will transfer what are materially the assets and business of the Barclays UK division to another subsidiary of the Group, the UK Ring-fenced Bank. Senior management expects that upon this transfer, the material risks with respect to the Bank Group will be the same in all material respects as those risks with respect to the Group. However, senior management has identified certain potential differences in risks with respect to the Bank Group as compared to risks to the Group.</p> <p>The transfer of the assets and liabilities of the Barclays UK division from the Issuer will mean that the Bank Group will be less diversified than the Group as a whole. The Issuer will not be the parent of the UK Ring-fenced Bank and thus will not have recourse to the assets of the UK Ring-fenced Bank.</p> <p>The implementation of ring-fencing may adversely affect the market value and/or liquidity of the Securities.</p> <p>(ii) Material existing and emerging risks potentially impacting more than one Principal Risk</p> <p>Credit risk: The risk of loss to the Group from the failure of clients, customers or counterparties, including sovereigns, to fully honour their obligations to the Group, including the whole and timely payment of principal, interest, collateral and other receivables. The Group may suffer financial loss if any of its customers, clients or counterparties fails to fulfil their contractual obligations to the Group.</p> <p>Market risk: The risk of a loss arising from potential adverse changes in the value of the Group's assets and liabilities from fluctuation in market variables including, but not limited to, interest rates, foreign exchange, equity prices, commodity prices, credit spreads, implied volatilities and asset correlations. The Group's trading business is generally exposed to a prolonged period of elevated asset price volatility, particularly if it negatively affects the depth of marketplace liquidity.</p> <p>Treasury and capital risk: The risk that the Group (i) is unable to meet its contractual or contingent obligations or that it does not have the appropriate amount, tenor and composition of funding and liquidity to support its assets,</p>
--	---

	<p>(ii) has an insufficient level or composition of capital to support its normal business activities and to meet its regulatory capital requirements, or (iii) is exposed to capital or income volatility because of a mismatch between the interest rate exposures of its assets and liabilities. The Group may not be able to achieve its business plans due to, among other things: a) being unable to maintain appropriate capital ratios; b) being unable to meet its obligations as they fall due; c) rating agency downgrades; d) adverse changes in foreign exchange rates on capital ratios; e) adverse movements in the pension fund; and f) non- traded market risk/interest rate risk in the banking book.</p> <p>Operational risk: The Group is exposed to many types of operational risk. These include: (i) the risk of failing to adequately manage the threat of cyber attacks and to continually evolve enterprise security and provide an active cyber security response capability could result in increased fraud losses, inability to perform critical economic functions, customer detriment, potential regulatory censure and penalty, legal liability, reduction in shareholder value and reputational damage; (ii) the risk of loss of or disruption to the Group's business processing, whether arising through impacts on technology systems, real estate services, personnel availability or the support of major suppliers, and which may result in significant customer detriment, cost to reimburse losses incurred by the Group's customers, potential regulatory censure or penalty, and reputational damage; (iii) to the extent that the Group depends on suppliers for the provision of many of its services and the development of future technology driven product propositions, there is a risk that client information or critical infrastructures is not adequately protected, the potential for a negative impact on the Group's ability to continue to provide services that are material to the Group following a failure by any such supplier and the potential for increased losses, inability to perform critical economic functions, customer detriment, potential regulatory censure and penalty, legal liability and reputational damages upon a failure to adequately manage outsourcing risk; (iv) the risk of material errors in operational processes, including payments, which could disadvantage the Group's customers, clients or counterparties and could result in regulatory censure and penalties, legal liability, reputational damage and financial loss by the Group; (v) the risk of a failure to closely monitor risk exposure to new and emergent technology, which could lead to customer detriment, loss of business, regulatory censure, missed business opportunity and reputational damage; (vi) the risk of fraudulent and other internal and external criminal activities, which could result in high profile material losses together with regulatory censure, penalties and significant reputational damage; (vii) the risk of the inability to hire and retain appropriately qualified employees, which could negatively impact the Group's financial performance, control environment and level of employee engagement as well as the disenfranchisement of certain customer groups, customer detriment and reputational damage; (viii) the risk that the Group failing to comply with tax laws and practices or managing its tax affairs in an appropriate manner, which could lead to losses due to additional tax charges, other financial costs or reputational damage; (ix) the risk that of incorrect judgements being exercised, or incorrect estimates or assumptions being used, in relation to International Financial Reporting Standards, which could result in significant loss to the Group, beyond what was anticipated or provided for; and (x) the risk of failing to accurately collect and maintain the large volumes of data (including personally identifiable information, intellectual property, and financial data) that the Group holds and to protect it from breaches of confidentiality and interference with its availability, which could lead to loss or unavailability of data and data integrity issues and could result in regulatory censure, legal liability and reputational damage.</p> <p>Model risk: The risk of the potential adverse consequences from financial assessments or decisions based on incorrect or misused model outputs and reports. Models are, by their nature, imperfect and incomplete representations</p>
--	---

		<p>of reality because they rely on assumptions and inputs, and so they may be subject to errors affecting the accuracy of their outputs. Models may also be misused. Model errors or misuse may result in the Group making inappropriate business decisions and being subject to financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.</p> <p>Conduct risk: The risk of detriment to customers, clients, market integrity, competition or the Group from the inappropriate supply of financial services, including instances of wilful or negligent misconduct. Ineffective product governance, could lead to poor customer outcomes, as well as regulatory sanctions, financial loss and reputational damage. The Group may be adversely affected if it fails to effectively mitigate the risk that its employees or third parties facilitate, or that its products and services are used to facilitate financial crime (money laundering, terrorist financing, bribery and corruption and sanctions evasion). Failure to protect personal data can lead to potential detriment to the Group's customers and clients, reputational damage, regulatory sanctions and financial loss, which under the new EU Data Protection Regulation may be substantial. Failure to meet the requirements and expectations of the UK Senior Managers Regime, Certification Regime and Conduct Rules may lead to regulatory sanctions, both for the individuals and the Group.</p> <p>Reputation risk: The risk that an action, transaction, investment or event will reduce trust in the Group's integrity and competence by clients, counterparties, investors, regulators, employees or the public.</p> <p>Legal risk and legal, competition and regulatory matters: The risk of loss or imposition of penalties, damages or fines from the failure of the Group to meet its legal obligations including regulatory or contractual requirements. Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and breaches of legislation and/or regulations may negatively affect the Group's results, reputation and ability to conduct its business. Legal outcomes can arise as a consequence of legal risk or because of past and future actions, behaviours and business decisions as a result of other Principal Risks.</p>
D.6	<p>Risk warning that investors may lose value of entire investment or part of it</p>	<p>You may lose some or all of your investment in the Securities:</p> <p>Even if the relevant Securities are stated to be repayable at an amount that is equal to or greater than their initial purchase price, you will lose up to the entire value of your investment if the Issuer fails or is otherwise unable to meet its payment obligations.</p> <p>You may also lose some or all of your entire investment, or part of it, if:</p> <ul style="list-style-type: none"> • the Underlying Asset performs in such a manner that the redemption amount payable or deliverable to you (whether at maturity or following any early redemption and including after deduction of any applicable taxes and expenses) is less than the initial purchase price; • you sell your Securities prior to maturity in the secondary market (if any) at an amount that is less than the initial purchase price; • the Securities are redeemed early following the occurrence of an extraordinary event in relation to the Underlying Asset(s), the Issuer, the Issuer's hedging arrangement, the relevant currencies or taxation (such as following an additional disruption event) and the amount you receive on such redemption is less than the initial purchase price; and/or
