

Barclays plc

Update

Key Rating Drivers

Diversified Revenue Mix: Barclays plc's ratings are underpinned by the group's strong franchises in UK retail, cards and corporate & investment banking (CIB) and a diversified revenue mix by product and geography. This is counterbalanced by the group's reliance on capital markets businesses, which are inherently volatile and competitive. The ratings are also supported by solid capitalisation and a strong funding and liquidity profile.

Profitability Recovery in 2021: Barclays remained profitable in 2020 despite exceptionally high impairments, lower interest rates and weaker lending revenue. Fitch Ratings expects profitability to recover in 2021, helped by conducive market conditions for CIB and lower provisioning, and despite pressure from the low interest rate environment and fragile corporate borrower confidence.

Adequate Capital Buffers: Barclays' end-1H21 CET1 ratio of 15.1% (14.7% excluding the IFRS 9 transitional relief) was comparable with that of global trading and universal bank peers. We expect organic capital generation to remain strong and sufficient for the CET1 ratio to remain within the bank's 13%-14% target range. Challenges that could arise during 2021 include risk-weighted assets (RWAs) inflation from rating migrations and reduced benefit from IFRS9 transitional relief as more loans start to migrate to Stage 3.

Downside Risks to Asset Quality: Barclays' asset-quality metrics have held up well so far, with an end-1H21 impaired (Stage 3) loan ratio of 2.5%. As government support for borrowers in the UK and US is unwound, Stage 3 inflows are likely to increase in 2H21 although we believe the deterioration will be manageable. This is in the context of the improved economic outlook and the group's conservative underwriting standards in domestic mortgages and corporate lending, including the routine use of risk transfer deals to help mitigate losses.

Strong Liquidity: Barclays' funding profile is stable and diversified, underpinned by a strong UK retail franchise to fund retail assets and good market access to fund wholesale operations. The group's Fitch-calculated loan/deposit ratio of 65% at end-1H21 is unusually strong and reflects crisis-driven deposit inflow rates, although in line with peers, the ratio should return to the mean as savings rates normalise and loan growth picks up. Liquidity is conservatively managed, with a liquidity coverage ratio of 162% which is well above regulatory requirements.

Rating Sensitivities

Sensitive to Economic Recovery: Barclays' ratings are sensitive to an unexpected severe setback in the economic recovery in the group's key markets. We would be likely to downgrade Barclays' and subsidiaries' ratings if the group's CET1 ratio, excluding the IFRS 9 transitional relief, looks set to fall towards 12% while asset quality and profitability challenges persist from the pandemic shock to the economy. The ratings would also likely be downgraded if we no longer expected the group's operating profit/RWAs to rise above 1.5% on a sustained basis.

The ratings could also be downgraded if the group increases its risk appetite to boost profitability in the near term. Evidence of this could be a significant increase in RWAs allocated to investment banking activities or towards higher-risk credit exposures.

Upside Potential: Under more normal economic conditions, the most likely trigger for an upgrade of Barclays' ratings would be evidence that, on a sustained basis the group can maintain operating/profit comfortably above 1.5%, resulting in a stronger capacity to generate capital organically. This would be in the context of the group ensuring sufficiently robust risk appetite and controls in light of its focus on more volatile investment banking activities, while maintaining healthy capital metrics and consistently strong asset quality performance.

The Viability Ratings (VRs) of Barclays' two main operating banks, Barclays Bank plc (BBplc) and Barclays Bank UK PLC (BBUK), reflect their standalone credit profiles, which include the benefit of ordinary support from the group. BBUK operates a simple, domestically focused, retail and SME banking business model, has solid asset quality and stable funding dominated by granular deposits. BBplc is the larger operating bank by balance sheet and houses the CIB and the international cards and payments businesses.

The Long-Term IDRs and senior debt ratings of BBplc and BBUK are rated one notch above their respective VRs, and one notch above the holdco's IDR. This is because of sufficiently large buffers of internal and external junior debt, which can protect both banks' external senior unsecured creditors from default in the event of failure.

BBUK's SR of '1' reflects our view of an extremely high probability of institutional support being made available from Barclays, and indirectly from BBplc if needed, given the ring-fenced bank's strategic role in the group and reputational considerations. Despite its size we believe that support would be manageable.

The Long and Short-Term IDRs of Barclays Bank Ireland Plc (BBI) and Barclays Capital Inc. (BCI) are equalised with those of their parent, BBplc's IDRs, which reflects our view of an extremely high likelihood that the subsidiaries would be supported if needed. Their Long-Term IDRs are equalised with BBplc's IDR rather than its VR because we expect sufficient internal loss=absorbing buffers to protect the subsidiaries' senior creditors if the group fails.

Fitch views the businesses conducted by BCI and BBI as core to the group and in particular to CIB's client relationships and strategy, which provides a strong incentive for BBplc to support them. BBI and BCI are highly integrated with BBplc in management, governance and common group risk policies. Regulatory requirements mean that capital and liquidity are not fully fungible, but balance sheet and funding integration is significant.

Debt Rating Classes

Rating level	Barclays plc	Barclays Bank UK PLC	Barclays Bank plc	Barclays Capital Inc.
Senior unsecured	A/F1	A+/F1	A+/F1	F1
Senior secured (GCMTN)	n.a.	n.a.	A+/F1	n.a.
Tier 2 subordinated debt	BBB+	n.a.	BBB+	n.a.
Legacy upper Tier 2 debt	n.a.	n.a.	BBB	n.a.
Additional Tier 1 notes, preference shares	BBB-	n.a.	BBB-	n.a.

Source: Fitch Ratings

Senior unsecured debt is rated in line with the issuing entities' IDRs.

The long and short-term debt ratings on BBplc's global collateralised medium-term note (GCMTN) programme and notes are at the same level as that of BBplc's senior unsecured debt. This is because the terms of the notes issued do not allow for a one-notch uplift of the ratings under Fitch's criteria.

Subordinated debt and other hybrid capital issued by Barclays and BBplc are all notched down from their respective VRs, in accordance with Fitch's assessment of each instrument's respective non-performance and relative loss severity risk profiles.

Significant Changes

Outlook Stabilised

We revised the Outlook on Barclays’ Long-Term IDR to Stable from Negative in July 2021 primarily because we believed the challenges to the UK and US economies from the coronavirus pandemic have subsided sufficiently to remove the negative outlook on the group’s ‘aa-’ operating environment score. The revision reflects too the recent revision of the Outlook on the UK’s ‘AA-’ IDR to Stable from Negative.

The Outlook revision also considers Fitch’s view that Barclays’ performance through the pandemic and its expected performance has increased rating headroom for the group to absorb pressure that could arise from remaining uncertainties caused by the pandemic. The group’s diversified business model, which combines retail and corporate banking with investment banking, has enabled it to report resilient earnings since the start of the health crisis and maintain healthy capital ratios.

Improved Economic Prospects

Businesses have adapted increasingly to the economic restrictions of the pandemic, and private consumption and investment have also been much more resilient. These developments resulted in an upward revision of Fitch’s UK real GDP growth estimate and forecast for 2020 and 2021 to minus 9.8% and 6.6%, respectively, moderating to 5.0% in 2022. We expect the unemployment rate to average just 5.4% in 2021, supported by the extension of income and job-support schemes and the continuation of fiscal and pandemic-related loan support to businesses.

The US economic outlook has also improved substantially in recent months, aided by the strong roll-out of vaccines and additional fiscal stimulus. This has led to the operating environment for banks operating in the US stabilising. Fitch recently revised up its US GDP growth for 2021 by 1.7pp to 6.2% amid the USD1.9 trillion coronavirus relief package and stronger-than-expected data for 1Q21.

Outlook on UK Sovereign Rating Revised to Stable

On 18 June 2021 Fitch affirmed the UK Long-Term IDR at 'AA-' and revised the Outlook to Stable from Negative. The stabilisation of the Outlook reflected recent macroeconomic, labour market and fiscal outturns since the start of 2021, showing the UK economy and public finances to be more resilient to the impact of the pandemic shock than Fitch had expected.

Factors Revised to Stable from Negative Trend

In light of improved expectations for the group's key markets, we now believe that downside risks to Barclays' earnings and asset quality have subsided which, combined with the bank's solid capitalisation and a strong funding and liquidity position, will continue to support the bank's VR, despite remaining uncertainties over the next few quarters.

We have revised the outlook on Barclays' 'a' asset-quality to stable from negative. This is because we expect the pick-up in Stage 3 inflows in 2H21, as government support for borrowers in the UK and US is unwound, to be more modest than previously expected. The reduced Stage 3 inflows reflect the improved economic outlook and the group's conservative underwriting standards in domestic mortgages and corporate lending, including the routine use of risk transfer deals to mitigate losses.

The outlook on Barclays' 'a-' earnings & profitability has also been stabilised as we expect the group to report operating profit/RWAs of between 1.5-2.0% over the next two years as the customer segments most affected by the pandemic (credit cards and payments) begin to recover owing to economic conditions becoming more normal. We expect market conditions (including still-high corporate capital and financing needs and continued economic uncertainty) to remain conducive for the CIB and for provisioning to come in materially lower than in 2020. This scenario is partly counterbalanced by pressure from the low interest rate environment and fragile corporate borrower confidence.

The stable outlook on capitalisation & leverage reflects our expectation the group will continue to maintain healthy capital ratios (within the bank's 13%-14% target range), underpinned by strong organic capital generation and lower-than-anticipated pro-cyclical RWAs inflation.

Lower Impairments Expected to Support Profitability Recovery in 2021

Barclays recorded a pre-tax profit of GBP2.6 billion in 2Q21 (return on tangible equity of 18%), compared to GBP0.4 billion in 2Q20, reflecting large model-driven provision releases on improved macroeconomic prospects. The pre-impairment operating profit of GBP1.8 billion was 26% lower qoq driven by a steep fall in the Fixed-Interest, Currencies and Commodities unit's trading income (minus 39% yoy) amid reduced trading activity, mitigated by a strong quarter for investment banking fees (+19%).

Improved IFRS9 economic assumptions and lower unsecured balances resulted in a net provision release of GBP0.8 billion in 2Q21 although management overlays of GBP1.9 billion (60bp of Fitch-calculated gross loans), provide a buffer to absorb increased impaired loans as government support is tapered in the coming quarters. Excluding provision releases, the group is on track to achieve its 10% ROTE target for 2021 and meet Fitch's forecast operating profit/RWAs of 1.5%-2.0%.

Assuming there is no set-back in the economic recovery, we expect the path to a medium-term ROTE of greater than 10% to be supported by favourable market conditions for the CIB, a stable underlying cost base and a pick-up in interest earning balances. Costs were slightly higher in 2Q21, including GBP0.3 billion of restructuring costs from the bank's real estate footprint review. Underlying costs (excluding structural cost actions and variable remuneration) are projected to remain flat in the coming quarters. Cost-cutting initiatives, including the optimisation of the retail bank's branch network, will act as a drag on near-term profits, however.

The CET1 ratio of 15.1% remains above the bank's 13%-14% target range. The group's management expects to remain above target during 2021, with additional share buybacks and a cautious approach given economic uncertainties and regulatory headwinds in 2022.

No Ratings Uplift from Sovereign Support Assessment

Barclays' and BBplc's SRs and Support Rating Floors reflect Fitch's view that senior creditors of the bank and the holding company cannot rely on extraordinary support from the sovereign in the event that Barclays or BBplc become non-viable. In our opinion, the UK has implemented legislation and regulations to provide a framework that is likely to require senior creditors to participate in losses for resolving even large banking groups. BBplc's SR is based on sovereign support because we believe that its role as the non-ring-fenced bank and its size mean that institutional support from Barclays and, indirectly from BBUK, is unlikely.

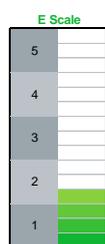

Environmental, Social and Governance Considerations

Credit-Relevant ESG Derivation

			Overall ESG Scale	
Barclays plc has 5 ESG potential rating drivers				
<ul style="list-style-type: none"> Barclays plc has exposure to compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security) but this has very low impact on the rating. Governance is minimally relevant to the rating and is not currently a driver. 	key driver	0	issues	5

How to Read This Page

ESG scores range from 1 to 5 based on a 15-level color gradation. Red (5) is most relevant and green (1) is least relevant.

The Environmental (E), Social (S) and Governance (G) tables break out the individual components of the scale. The right-hand box shows the aggregate E, S, or G score. General Issues are relevant across all markets with Sector-Specific Issues unique to a particular industry group. Scores are assigned to each sector-specific issue. These scores signify the credit-relevance of the sector-specific issues to the issuing entity's overall credit rating. The Reference box highlights the factor(s) within which the corresponding ESG issues are captured in Fitch's credit analysis.

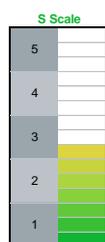

The Credit-Relevant ESG Derivation table shows the overall ESG score. This score signifies the credit relevance of combined E, S and G issues to the entity's credit rating. The three columns to the left of the overall ESG score summarize the issuing entity's sub-component ESG scores. The box on the far left identifies some of the main ESG issues that are drivers or potential drivers of the issuing entity's credit rating (corresponding with scores of 3, 4 or 5) and provides a brief explanation for the score.

Classification of ESG issues has been developed from Fitch's sector ratings criteria. The General Issues and Sector-Specific Issues draw on the classification standards published by the United Nations Principles for Responsible Investing (PRI) and the Sustainability Accounting Standards Board (SASB).

Sector references in the scale definitions below refer to Sector as displayed in the Sector Details box on page 1 of the navigator.

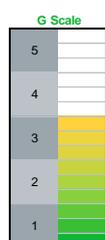

Social (S)

General Issues	S Score	Sector-Specific Issues	Reference
Human Rights, Community Relations, Access & Affordability	2	Services for underbanked and underserved communities; SME and community development programs; financial literacy programs	Company Profile; Management & Strategy; Risk Appetite
Customer Welfare - Fair Messaging, Privacy & Data Security	3	Compliance risks including fair lending practices, mis-selling, repossession/foreclosure practices, consumer data protection (data security)	Operating Environment; Company Profile; Management & Strategy; Risk Appetite
Labor Relations & Practices	2	Impact of labor negotiations, including board/employee compensation and composition	Company Profile; Management & Strategy
Employee Wellbeing	1	n.a.	n.a.
Exposure to Social Impacts	2	Shift in social or consumer preferences as a result of an institution's social positions, or social and/or political disapproval of core banking practices	Company Profile; Financial Profile

Governance (G)

General Issues	G Score	Sector-Specific Issues	Reference
Management Strategy	3	Operational implementation of strategy	Management & Strategy
Governance Structure	3	Board independence and effectiveness; ownership concentration; protection of creditor/stakeholder rights; legal /compliance risks; business continuity; key person risk; related party transactions	Management & Strategy; Earnings & Profitability; Capitalisation & Leverage
Group Structure	3	Organizational structure; appropriateness relative to business model; opacity; intra-group dynamics; ownership	Company Profile
Financial Transparency	3	Quality and frequency of financial reporting and auditing processes	Management & Strategy

CREDIT-RELEVANT ESG SCALE	
How relevant are E, S and G issues to the overall credit rating?	
5	Highly relevant, a key rating driver that has a significant impact on the rating on an individual basis. Equivalent to "higher" relative importance within Navigator.
4	Relevant to rating, not a key rating driver but has an impact on the rating in combination with other factors. Equivalent to "moderate" relative importance within Navigator.
3	Minimally relevant to rating, either very low impact or actively managed in a way that results in no impact on the entity rating. Equivalent to "lower" relative importance within Navigator.
2	Irrelevant to the entity rating but relevant to the sector.
1	Irrelevant to the entity rating and irrelevant to the sector.

The highest level of ESG credit relevance is a score of '3'. ESG issues are credit-neutral or have only a minimal credit impact on Barclays and other group entities either due to their nature or the way in which they are being managed. For more information on Fitch's ESG Relevance Scores, visit www.fitchratings.com/esg.

The ratings above were solicited and assigned or maintained at the request of the rated entity/issuer or a related third party. Any exceptions follow below.

In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind, and Fitch does not represent or warrant that the report or any of its contents will meet any of the requirements of a recipient of the report. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion and reports made by Fitch are based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings and reports are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating or a report. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at any time for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act of 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
