Each Security will only pay interest in respect of an Interest Valuation Date if the closing level of every Underlying Asset on such Interest Valuation Date is greater than or equal to its corresponding Interest Barrier. If this occurs, the amount of interest payable with respect to that Interest Valuation Date is calculated by adding the sum of (1) and (2) below:

- (1) the fixed rate of 1.60% multiplied by EUR 1,000; and
- (2) the number of previous Interest Valuation Dates in respect of which no interest was payable (since the last time interest was payable) multiplied by the fixed rate of 1.60% multiplied by EUR 1,000.

**"Initial Price<sub>(Interest)</sub>"** means as stated above in the table specifying the Underlying Assets.

**"Initial Valuation Date"** means 19 February 2020, subject to adjustment.

In respect of an Interest Valuation Date, the **"Interest Barrier"** means the Interest Barrier Percentage corresponding to such Interest Valuation Date multiplied by the Initial Price of the Underlying Asset. \_\_\_\_\_

**B – Automatic Settlement (Autocall)**

The Securities will automatically redeem if the value of performance calculated in respect of the closing price or level of worst-performing Underlying Asset is at or above its corresponding Autocall Barrier Percentage on any Autocall Valuation Date. If this occurs, you will receive a cash payment equal to the nominal amount of your securities multiplied by 100% payable on the Autocall Settlement Date corresponding to such Autocall Valuation Date.

**D – Final Settlement**

If the Securities have not otherwise redeemed (or have not redeemed due to Automatic Settlement (Autocall)), each Security will be redeemed on 4 March 2025 (the "**Scheduled Settlement Date**") by payment of the Final Cash Settlement Amount.

The Final Cash Settlement Amount is calculated as follows:

- (i) if the Final Performance is greater than or equal to the Strike Price Percentage ("**SPP**") (being 100%), or the Final Performance is greater than or equal to the Knock-in Barrier Percentage (being 60%), 100% multiplied by the Calculation Amount;

		<p>(ii) otherwise, an amount calculated by dividing the Final Valuation Price of the Worst Performing Underlying Asset by the Strike Price of the Worst Performing Underlying Asset and multiplying the result by the Calculation Amount.</p> <p><b>"Final Performance"</b> means the Final Valuation Price divided by the Initial Price<sub>(Settlement)</sub>.</p> <p><b>"Final Valuation Date"</b> means 19 February 2025, subject to adjustment.</p> <p><b>"Final Valuation Price"</b> means, in respect of the Underlying Asset, the closing price of the Underlying Asset on the Final Valuation Date.</p> <p><b>"Initial Price<sub>(Settlement)</sub>"</b> means as stated above in the table specifying the Underlying Assets.</p> <p><b>"Worst Performing Underlying Asset"</b> means the Reference Asset with the lowest Final Performance, provided that, in each case, where more than one Underlying Asset has the same lowest Final Performance, the Determination Agent shall select which of the Underlying Assets with the same lowest Final Performance shall be the Worst Performing Underlying Asset.</p>

<b>Section D – Risks</b>		
D.2	<b>Key information on the key risks that are specific to the Issuer</b>	<p>The risks described below are material existing and emerging risks which senior management has identified with respect to the Bank Group.</p> <p><b>(i) Material existing and emerging risks potentially impacting more than one principal risk</b></p> <p><b>Business conditions, general economy and geopolitical issues</b></p> <p>The Bank Group's business mix spreads across multiple geographies and client types. The breadth of these operations means that deterioration in the economic environment, or an increase in political instability in countries where the Bank Group is active, or in any systemically important economy, could adversely affect the Bank Group's operating performance, financial condition and prospects.</p> <p><b>Process of UK withdrawal from the European Union</b></p> <p>The uncertainty around Brexit spanned the whole of 2018, and intensified in the second half of the year. The full impact of the withdrawal may only be realised in years to come, as the economy adjusts to the new regime, but the Bank Group continues to monitor the most relevant risks, including those that may have a more immediate impact, for its business:</p> <ul style="list-style-type: none"> <li>• Market volatility, including in currencies and interest rates, might increase which could have an impact on the value of the Bank Group's trading book positions.</li> <li>• Potential UK financial institutions credit spread widening could lead to reduced investor appetite for the Bank Group's debt securities; this could</li> </ul>

		<p>negatively impact the cost of, and/or access to, funding.</p> <ul style="list-style-type: none"> <li>• A credit rating agency downgrade applied directly to the Bank Group, or indirectly as a result of a credit rating agency downgrade to the UK Government, could significantly increase the Bank Group's borrowing costs, credit spreads and materially adversely affect the Bank Group's interest margins and liquidity position.</li> <li>• Changes in the long-term outlook for UK interest rates may adversely affect pension liabilities and the market value of investments funding those liabilities;</li> <li>• Increased risk of a UK recession with lower growth, higher unemployment and falling UK house prices. This would negatively impact a number of the Bank Group's portfolios.</li> <li>• The implementation of trade and customs barriers between the UK and EU could lead to delays and increased costs in the passage of goods for corporate banking customers. This could negatively impact the levels of customer defaults and business volumes which may result in an increase in the Bank Group's impairment charges and a reduction in revenues.</li> <li>• Changes to current EU "Passporting" rights may require further adjustment to the current model for the Bank Group's cross-border banking operation which could increase operational complexity and/or costs.</li> <li>• The ability to attract, or prevent the departure of, qualified and skilled employees may be impacted by the UK's and the EU's future approach to the EU freedom of movement and immigration from the EU countries and this may impact the Bank's access to the EU talent pool.</li> <li>• The legal framework within which the Bank Group operates could change and become more uncertain if the UK takes steps to replace or repeal certain laws currently in force, which are based on EU legislation and regulation following its withdrawal from the EU.</li> <li>• Should the UK lose automatic qualification to be part of Single Euro Payments Area there could be a resultant impact on the efficiency of, and access to, European payment systems. In addition, loss of automatic qualification to the European Economic Area (EEA) or access to financial markets infrastructure could impact service provision for clients, likely resulting in reduced market share and revenue and increased operating costs for the Bank Group.</li> <li>• There are certain execution risks relating to the transfer of the Bank Group's European businesses to Barclays Bank Ireland PLC. Technology change could result in outages or operational errors leading to delays in the transfer of assets and liabilities to Barclays Bank Ireland PLC, and delayed delivery could lead to European clients losing access to products and service and increased reputational risk.</li> </ul> <p><b>Interest rate rises adversely impacting credit conditions</b></p> <p>To the extent that central banks increase interest rates particularly in the Bank Group's main markets, in the UK and the US, there could be an impact on consumer debt affordability and corporate profitability. While interest rate rises</p>
--	--	---

could positively impact the Bank Group's profitability, as retail and corporate business income may increase due to margin de-compression, future interest rate increases, if larger or more frequent than expectations, could cause stress in the loan portfolio and underwriting activity of the Bank Group. Higher credit losses driving an increased impairment allowance would most notably impact retail unsecured portfolios and wholesale non-investment grade lending. Changes in interest rates could also have an adverse impact on the value of high quality liquid assets which are part of the Bank Group Treasury function's investment activity. Consequently, this could create more volatility than expected through the Bank Group's FVOCI reserves.

**Regulatory change agenda and impact on business model**

The Bank Group remains subject to ongoing significant levels of regulatory change and scrutiny in many of the countries in which it operates (including, in particular, the UK and the US). A more intensive regulatory approach and enhanced requirements together with the uncertainty (particularly in light of the UK's withdrawal from the EU) and potential lack of international regulatory co-ordination as enhanced supervisory standards are developed and implemented may adversely affect the Bank Group's business, capital and risk management strategies and/or may result in the Bank Group deciding to modify its legal entity structure, capital and funding structures and business mix, or to exit certain business activities altogether or not to expand in areas despite otherwise attractive potential.

**(ii) Material existing and emerging risks impacting individual principal risks**

**Credit risk:**

1. **Impairment:** The introduction of the impairment requirements of IFRS 9 Financial Instruments, implemented on 1 January 2018, results in impairment loss allowances that are recognised earlier, on a more forward looking basis and on a broader scope of financial instruments than has been the case under IAS 39 and has had, and may continue to have, a material impact on the Bank Group's financial condition.
2. **Specific sectors and concentrations:** The Bank Group is subject to risks arising from changes in credit quality and recovery rate of loans and advances due from borrowers and counterparties in a specific portfolio. Any deterioration in credit quality could lead to lower recoverability and higher impairment in a specific sector.
3. **Environmental risk:** The Bank Group is exposed to credit risks arising from energy and climate change. Indirect risks may be incurred as a result of environmental issues impacting the credit worthiness of the borrower resulting in higher impairment.

**Market risk:** An uncertain outlook for the direction of monetary policy, the US-China trade conflict, slowing global growth and political concerns in the US and Europe (including Brexit) are some of the factors that could heighten market risks for the Bank Group's portfolios.

In addition, the Bank Group's trading business is generally exposed to a prolonged period of elevated asset price volatility, particularly if it negatively affects the depth of marketplace liquidity. Such a scenario could impact the Bank

		<p>Group's ability to execute client trades and may also result in lower client flow-driven income and/or market-based losses on its existing portfolio of market risks. These can include having to absorb higher hedging costs from rebalancing risks that need to be managed dynamically as market levels and their associated volatilities change.</p> <p><b>Treasury and capital risk:</b> The Bank Group may not be able to achieve its business plans due to: a) inability to maintain appropriate capital ratios; b) inability to meet its obligations as they fall due; c) rating agency downgrades; d) adverse changes in foreign exchange rates on capital ratios; e) adverse movements in the pension fund; f) non-traded market risk/interest rate risk in the banking book.</p> <p><b>Operational risk:</b></p> <ul style="list-style-type: none"> <li>• <b>Cyber threat:</b> The financial sector remains a primary target for cyber criminals. There is an increasing level of sophistication in both criminal and nation state hacking for the purpose of stealing money, stealing, destroying or manipulating data, and/or disrupting operations. Other events have a compounding impact on services and customers. Failure to adequately manage this threat could result in increased fraud losses, inability to perform critical economic functions, customer detriment, potential regulatory censure or penalties, legal liability, reduction in shareholder value and reputational damage.</li> <li>• <b>Fraud:</b> Criminals continue to adapt their techniques and are increasingly focused on targeting customers and clients through ever more sophisticated methods of social engineering. External data breaches also provide criminals with the opportunity to exploit the growing levels of compromised data. These threats could lead to customer detriment, loss of business, regulatory censure, missed business opportunity and reputational damage.</li> <li>• <b>Operational resilience:</b> The loss of or disruption to the Bank Group's business processing is a material inherent risk theme within the Bank Group and across the financial services industry, whether arising through impacts on technology systems, real estate services, personnel availability or the support of major suppliers. Failure to build resilience into business processes or into the services of technology, real estate or suppliers on which the Bank Group business processes depend may result in significant customer detriment, costs to reimburse losses incurred by customers, potential regulatory censure or penalties, and reputational damage.</li> <li>• <b>Supplier exposure:</b> The Bank Group depends on suppliers for the provision of many of its services and the development of technology. Failure to monitor and control the Bank Group's suppliers could potentially lead to client information or critical infrastructures not being adequately protected or available when required. Failure to adequately manage outsourcing risk could result in increased losses, inability to perform critical economic functions, customer detriment, potential regulatory censure, legal liability and reputational damages.</li> <li>• <b>Processing error:</b> Material operational or payment errors could disadvantage the Bank Group's customers, clients or counterparties and</li> </ul>

		<p>could result in regulatory censure, legal liability, reputational damage and financial loss for the Bank Group.</p> <ul style="list-style-type: none"> <li>• New and emerging technology: Introducing new forms of technology, however, also has the potential to increase inherent risk. Failure to evaluate, actively manage and closely monitor risk exposure during all phases of business development could lead to customer detriment, loss of business, regulatory censure, missed business opportunity and reputational damage.</li> <li>• Ability to hire and retain appropriately qualified employees: Failure to attract or prevent the departure of appropriately qualified employees could negatively impact the Bank Group's financial performance, control environment and level of employee engagement. Additionally, this may result in disruption to service which could in turn lead to disenfranchising certain customer groups, customer detriment and reputational damage.</li> <li>• Tax risk: There is a risk that the Bank Group could suffer losses due to additional tax charges, other financial costs or reputational damage as a result of failing to comply with such laws and practice, or by failing to manage its tax affairs in an appropriate manner, with much of this risk attributable to the international structure of the Bank Group.</li> <li>• Critical accounting estimates and judgements: The preparation of financial statements in accordance with IFRS requires the use of estimates. It also requires management to exercise judgement in applying relevant accounting policies. There is a risk that if the judgement exercised, or the estimates or assumptions used, subsequently turn out to be incorrect, this could result in significant loss to the Bank Group, beyond what was anticipated or provided for.</li> <li>• Data management and information protection: The Bank Group holds and processes large volumes of data, including personally identifiable information, intellectual property, and financial data. Failure to accurately collect and maintain this data, protect it from breaches of confidentiality and interference with its availability exposes the Bank Group to the risk of loss or unavailability of data or data integrity issues. This could result in regulatory censure, legal liability and reputational damage, including the risk of substantial fines under the General Data Protection Regulation (the “GDPR”), which strengthens the data protection rights for customers and increases the accountability of the Bank Group in its management of that data.</li> <li>• Unauthorised or rogue trading: Unauthorised trading, such as a large unhedged position, which arises through a failure of preventative controls or deliberate actions of the trader, may result in large financial losses for the Bank Group, loss of business, damage to investor confidence and reputational damage.</li> <li>• Algorithmic trading: In some areas of the investment banking business, trading algorithms are used to price and risk manage client and principal transactions. An algorithmic error could result in increased market exposure and subsequent financial losses for the Bank Group and potential loss of business, damage to investor confidence and</li> </ul>

		<p>reputational damage.</p> <p><b>Model risk:</b> The Bank Group relies on models to support a broad range of business and risk management activities, including informing business decisions and strategies, measuring and limiting risk, valuing exposures, conducting stress testing, assessing capital adequacy, supporting new business acceptance and risk and reward evaluation, managing client assets, and meeting reporting requirements. Models are, by their nature, imperfect and incomplete representations of reality. Models may also be misused. Model errors or misuse may result in the Bank Group making inappropriate business decisions and being subject to financial loss, regulatory risk, reputational risk and/or inadequate capital reporting.</p> <p><b>Conduct risk:</b> There is the risk of detriment to customers, clients, market integrity, effective competition or the Bank Group from the inappropriate supply of financial services, including instances of wilful or negligent misconduct.</p> <ol style="list-style-type: none"> <li>1. Ineffective product governance could lead to poor customer outcomes, regulatory sanctions, financial loss and reputational damage.</li> <li>2. The Bank Group may be adversely affected if it fails to effectively mitigate the risk that third parties or its employees facilitate, or that its products and services are used to facilitate financial crime. Failure to comply may lead to enforcement action by the Bank Group's regulators together with severe penalties, affecting the Bank Group's reputation and financial results.</li> <li>3. Failure to protect personal data can lead to potential detriment to the Bank Group's customers and clients, reputational damage, regulatory sanctions and financial loss, which under the GDPR may be substantial.</li> <li>4. Failure to meet the requirements and expectations of the UK Senior Managers Regime, Certification Regime and Conduct Rules may lead to regulatory sanctions, both for the individuals and the Bank Group.</li> </ol> <p><b>Reputation risk:</b> A risk arising in one business area can have an adverse effect upon the Bank Group's overall reputation; any one transaction, investment or event that, in the perception of key stakeholders reduces their trust in the Bank Group's integrity and competence.</p> <p>The Bank Group's associations with sensitive topics and sectors have the potential to give rise to reputation risk for the Bank Group and may result in loss of business, regulatory censure and missed business opportunity.</p> <p>In addition, reputation risk has the potential to arise from operational issues or conduct matters which cause detriment to customers, clients, market integrity, effective competition or the Bank Group.</p> <p><b>Legal risk and legal, competition and regulatory matters:</b> Legal disputes, regulatory investigations, fines and other sanctions relating to conduct of business and breaches of legislation and/or regulations may negatively affect the Bank Group's results, reputation and ability to conduct its business.</p> <p>The Bank Group conducts diverse activities in a highly regulated global market and therefore is exposed to the risk of fines and other sanctions. A breach of applicable legislation and/or regulations could result in the Bank Group or its staff being subject to criminal prosecution, regulatory censure, fines and other sanctions in the jurisdictions in which it operates. Where clients, customers or other third parties are harmed by the Bank Group's conduct, this may also give rise to legal proceedings, including class actions. Other legal disputes may also arise between the Bank Group and third parties relating to matters such as breaches, enforcement of legal rights or obligations arising under contracts, statutes or common law. Adverse findings in any such matters may result in the Bank Group being liable to third parties or may result in the Bank Group's rights not being enforced as intended. The outcome of legal, competition and regulatory matters, both those to which the Bank Group is currently exposed and any others which may arise in the future, is difficult to predict. In connection with such matters, the Bank Group may incur significant expense, regardless of the ultimate outcome. In light of the uncertainties involved in legal, competition and regulatory matters, there can be no assurance that the outcome of a particular matter or matters will not be material to the Bank Group's results of operations or cash flow for a particular period.</p> <p><b>Resolution actions (including bail-in actions) in the event the Issuer is failing or likely to fail could materially adversely affect the value of the Securities</b></p> <p>Under the UK Banking Act, the Bank of England, the HM Treasury and a number of other UK authorities have substantial powers to take a range of resolution actions to rescue a financial institution (such as the Issuer), where it considers the relevant institution to be failing or likely to fail. In such case, the relevant UK resolution authority could exercise such powers to (a) transfer all or part of the institution's business to a third party and/or to a "bridge bank" and/or to a vehicle created by the resolution authority, (b) take the institution into temporary public ownership, (c) provided the conditions are met, exercise the 'bail-in tool' or (d) require some combination thereof. Exercise of the 'bail-in tool' in respect of the Issuer and the Securities would be expected to be made without the consent of the holders of the Securities, and could result in the cancellation of all, or some, of the principal amount of, interest on, the Securities and/or the conversion of the Securities into shares or other obligations of the Issuer or another person, or any other modification to the terms of the Securities. The exercise of resolution powers in respect of the Issuer and the Securities (in particular, the 'bail-in tool') could materially adversely affect the rights of the holders of the Securities, the value of the Securities and/or the ability of the Issuer to satisfy its obligations under the Securities, and holders of the Securities could lose some or all of their investment.</p>
D.6	<p><b>Risk warning that investors may lose value of entire investment or part of it</b></p>	<p><b>You may lose some or all of your investment in the Securities:</b></p> <p>Even if the relevant Securities are stated to be repayable at an amount that is equal to or greater than their initial purchase price, you will lose up to the entire value of your investment if the Issuer fails or is otherwise unable to meet its payment obligations.</p> <p>You may also lose some or all of your entire investment, or part of it, if:</p> <ul style="list-style-type: none"> <li>• the Underlying Asset performs in such a manner that the settlement amount payable or deliverable to you (whether at maturity or following any early redemption and including after deduction of any applicable taxes and expenses) is less than the initial purchase price;</li> <li>• you sell your Securities prior to maturity in the secondary market (if any) at an amount that is less than the initial purchase price;</li> <li>• the Securities are redeemed early following the occurrence of an extraordinary event in relation to the Underlying Asset(s), the Issuer, the Issuer's hedging arrangement, the relevant currencies or taxation (such as</li> </ul>

		<p>following an additional disruption event) and the amount you receive on such redemption is less than the initial purchase price; and/or</p> <ul style="list-style-type: none"> <li>• the terms and conditions of the Securities are adjusted (in accordance with the terms and conditions of the Securities) with the result that the redemption amount payable to you and/or the value of the Securities is reduced.</li> </ul> <p><b>Reinvestment risk/loss of yield:</b> Following an early redemption of the Securities for any reason, holders may be unable to reinvest the redemption proceeds at a rate of return as high as the return on the Securities being redeemed.</p> <p><b>Issuer optional early redemption:</b> The ability of the Issuer to early redeem the Securities will mean an investor is no longer able to participate in the performance of any Underlying Assets. This feature may limit the market value of the Securities.</p> <p><b>Settlement expenses:</b> Payments, deliveries and settlement under the Securities may be subject to deduction of taxes and settlement expenses, if applicable.</p> <p><b>Conditions to settlement:</b> Settlement is subject to satisfaction of all conditions to settlement by the investor.</p> <p><b>Volatile market prices:</b> The market value of the Securities is unpredictable and may be highly volatile, as it can be affected by many unpredictable factors, including: market interest and yield rates; fluctuations in foreign exchange rates; exchange controls; the time remaining until the Securities mature; economic, financial, regulatory, political, terrorist, military or other events in one or more jurisdictions; changes in laws or regulations; and the Issuer's creditworthiness or perceived creditworthiness.</p> <p><b>Return linked to performance of an Underlying Asset:</b> The return payable on the Securities is linked to the change in value of the Underlying Asset over the life of the Securities. Any information about the past performance of any Underlying Asset should not be taken as an indication of how prices will change in the future. You will not have any rights of ownership, including, without limitation, any voting rights or rights to receive dividends, in respect of any Underlying Asset.</p> <p><b>Equity Index Risks:</b> Securities linked to the performance of equity indices provide investment diversification opportunities, but will be subject to the risk of fluctuations in both equity prices and the value and volatility of the relevant equity index. Securities linked to equity indices may not participate in dividends or any other distributions paid on the shares which make up such indices, accordingly, you may receive a lower return on the Securities than you would have received if you had invested directly in those shares.</p> <p>The Index Sponsor can add, delete or substitute the components of an equity index at its discretion, and may also alter the methodology used to calculate the level of such index. These events may have a detrimental impact on the level of that index, which in turn could have a negative impact on the value of and return on the Securities.</p> <p><b>Substitution:</b> Where any equity index is affected by certain disruption events, provided a pre-nominated equity index is specified in the Final Terms, the Issuer may substitute such equity index with the pre-nominated equity index. The subsequent performance or perceived value of the pre-nominated equity index may cause the value of the Securities to drop and/or may result in holders receiving less than expected on settlement.</p> <p><b>Capped return:</b> As the redemption amount is subject to a cap, the value of or</p>

		<p>return on your Securities may be significantly less than if you had purchased the Underlying Asset(s) directly.</p> <p><b>Worst-of:</b> You are exposed to the performance of every Underlying Asset. Irrespective of how the other Underlying Assets perform, if any one or more Underlying Assets fail to meet a relevant threshold or barrier for the payment of interest or the calculation of any redemption amount, you might receive no interest payments and/or could lose some or all of your initial investment.</p> <p><b>Underlying foreign exchange rates:</b> Securities will be exposed to the performance of one or more underlying foreign exchange rates. Foreign exchange rates are highly volatile and are determined by a wide range of factors including supply and demand for currencies, inflation, interest rates; economic forecasts, political issues, the convertibility of currencies and speculation.</p> <p><b>Memory interest:</b> the interest amount is conditional on the performance of Underlying Asset(s) and may be zero where the performance criteria are not met. In such case the interest amount may be deferred to the next interest payment that may be made, but you will not be paid any amount to compensate for such deferral and it is possible that you will not receive any interest at all over the lifetime of the Securities.</p>
<b>Section E – Offer</b>		
<b>E.2b</b>	<b>Reasons for offer and use of proceeds when different from making profit and/or hedging certain risks</b>	Not Applicable: the net proceeds will be applied by the Issuer for making profit and/or hedging certain risks.
<b>E.3</b>	<b>Description of the terms and conditions of the offer</b>	The Securities have been offered to the dealer or Manager at the Issue Price. The Securities have not been offered to the public.
<b>E.4</b>	<b>Description of any interest material to the issue/offer, including conflicting interests</b>	<p>The relevant Manager or authorised offeror(s) may be paid fees in relation to any issue or offer of Securities. Potential conflicts of interest may exist between the Issuer, Determination Agent, relevant Manager or authorised offeror(s) or their affiliates (who may have interests in transactions in derivatives related to the Underlying Asset(s) which may, but are not intended to, adversely affect the market price, liquidity or value of the Securities) and holders.</p> <p>Not Applicable: no person involved in the issue or offer has any interest, or conflicting interest, that is material to the issue or offer of Securities.</p>
<b>E.7</b>	<b>Estimated expenses charged to investor by issuer/offeror</b>	The Issuer will not charge any expenses to holders in connection with any issue of Securities.
