Fitch Ratings-London-20 December 2018: Fitch Ratings has upgraded the Long-Term Issuer Default Ratings (IDRs) of Barclays Bank plc (BB plc), Barclays Bank UK plc (BBUK plc) and Barclays Bank Ireland plc (BBI) to 'A+' from 'A' and removed them from Rating Watch Positive (RWP). The Outlooks are Stable.

The upgrades follow the increase of subordinated debt buffers at the operating companies. The 'a' Viability Ratings (VRs) of BB plc and BBUK plc and the ratings of the holding company, Barclays plc (A/Stable/a), are unaffected by this rating action. A full list of rating actions is at the end of this Rating Action Commentary.

KEY RATING DRIVERS
IDRS, DERIVATIVE COUNTERPARTY RATINGS (DCRS) AND SENIOR DEBT RATINGS
The Long-Term IDRs of BB plc and BBUK plc are now one notch above the banks' respective VRs. The upgrades of the Long-Term IDRs, DCRs and senior debt ratings reflect the amended ranking of internal senior loans extended to both entities by their parent, Barclays plc, using the proceeds from its senior unsecured issuance. This makes the internal loans eligible for the purpose of internal minimum requirement for eligible liabilities (MREL). Following the amendments, the internal loans rank junior to ordinary senior unsecured debt, and combined with the existing large volumes of hybrid additional tier 1 (AT1) instruments and tier 2 debt, are in our view sufficient to protect both banks' external senior unsecured creditors in case of failure.

In Fitch's view, the sustainability of the buffers at both entities is supported by Barclays plc's consolidated MREL (29.9% of risk-weighted assets (RWAs) by 2022 based on current requirements, including a 0.5% counter-cyclical buffer) and by the expected internal MREL applicable to BB plc and BBUK plc. If the group enters resolution, Fitch's view of the regulatory intervention point and post-resolution capital needs suggests a buffer of qualifying junior and internal MREL-eligible debt of at least about 9% of RWAs in the case of BB plc and about 10% of RWAs in the case of BBUK plc could be required to restore their viability without hitting external senior creditors.

The DCRs of BB plc and BBUK plc are at the same level as their Long-Term IDRs because derivative counterparties have no definitive preferential status over other senior obligations in a resolution scenario in the UK. The Short-Term IDRs of 'F1' are the lower option mapping to an 'A+' Long-Term IDR since the debt buffers that benefit the Long-Term IDRs do not confer any liquidity enhancements for the banks.

BBI's ratings are equalised with BB plc's. Fitch has equalised BBI's Long-Term IDR with BB plc's rather than the parent's VR because the parent has placed at BBI a significant buffer of internal debt subordinated to external senior creditors and of qualifying junior debt, which we view as sustainable and which is likely to be sufficient to recapitalise BBI in case of need without imposing losses on external senior creditors.

RATING SENSITIVITIES
IDRS, DCRS AND SENIOR DEBT RATINGS
The ratings of BB plc and BBUK plc are sensitive to the amounts of qualifying junior and internal subordinated debt downstreamed from Barclays plc, and could be downgraded should the combined buffer of debt that is subordinated to external senior creditors fall below around 9%
of RWAs for BB plc and around 10% of RWAs for BBUK plc. The ratings are also sensitive to changes in the banks' VRs (see 'Fitch Affirms Barclays plc's IDR at 'A'' dated 21 June 2018).

BBI's ratings are primarily sensitive to BB plc's ratings, and to the amount of qualifying junior and internal subordinated debt held at the Irish subsidiary. BBI's IDR would be equalised with BB plc's VR should the combined buffer of subordinated debt fall below our required recapitalisation amount, which at 8% of RWAs is BBI's Pillar 1 total capital requirement but could be higher depending on future Pillar 2 or capital buffer requirements. BBI's ratings are also sensitive to Fitch's assessment of BB plc's propensity to support BBI (see 'Fitch Rates Barclays Bank Ireland 'A'; on Rating Watch Positive' dated 03 July 2018).

The rating actions are as follows:

Barclays Bank Plc
Long-Term IDR: upgraded to 'A+' from 'A'; off RWP; Outlook Stable

Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US$1,000 to US$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US$10,000 to US$1,500,000 (or the applicable currency equivalent).
